PART I

Item 1. Business

Air T, Inc. (the "Company," "Air T," "we" or "us" or "our") is a holding company with a portfolio of operating businesses and financial assets. Our goal is to prudently and strategically diversify Air T's earnings power and compound the growth in its free cash flow per share over time.

We currently operate in four industry segments:

- Overnight air cargo, which operates in the air express delivery services industry;
- Ground equipment sales, which manufactures and provides mobile deicers and other specialized equipment products to passenger and cargo airlines, airports, the military and industrial customers;
- Commercial aircraft, engines and parts, which manages and leases aviation assets; supplies surplus and
 aftermarket commercial jet engine components; provides commercial aircraft disassembly/part-out services;
 commercial aircraft parts sales; procurement services and overhaul and repair services to airlines and;
- Corporate and other, which acts as the capital allocator and resource for other consolidated businesses. Further, Corporate and other is also comprised of insignificant businesses that do not pertain to other reportable segments.

The Company also has ownership interests in Insignia Systems, Inc. ("Insignia") and Cadillac Casting, Inc. ("CCI"). The operations of these companies are not consolidated into the operations of the Company. See Notes to Consolidated Financial Statements included under Part II, Item 8 of this report.

On September 30, 2019, we completed the sale of 100% of the equity ownership in the Company's wholly-owned subsidiary, Global Aviation Services, LLC ("GAS"), which previously constituted the ground support services segment. See Note 2, Discontinued Operations, of Notes to Consolidated Financial Statements included under Part II, Item 8 of this report.

Each business segment has separate management teams and infrastructures that offer different products and services. We evaluate the performance of our business segments based on operating income and Adjusted EBITDA.

Certain financial data with respect to the Company's geographic areas and segments is set forth in <u>Notes 20</u> and <u>21</u> of <u>Notes to Consolidated Financial Statements included under Part II, Item 8</u> of this report.

Air T was incorporated under the laws of the State of Delaware in 1980. The principal place of business of Air T and Mountain Air Cargo, Inc. ("MAC") is 5930 Balsom Ridge Road, Denver, North Carolina. The principal place of business of CSA Air, Inc. ("CSA") is Iron Mountain, Michigan. The principal place of business for Global Ground Support, LLC ("GGS") is Olathe, Kansas. The principal place of business of Delphax Technologies, Inc ("Delphax") is Minneapolis, Minnesota. The principal place of business for Delphax Solutions, Inc. ("DSI") is Mississauga, Canada. The principal place of business of Contrail Aviation Support, LLC ("Contrail") is Verona, Wisconsin. The principal place of business of AirCo, LLC, AirCo 1, LLC, AirCo 2, LLC and AirCo Services, LLC (Collectively, "AirCo") and Worthington Aviation, LLC ("Worthington") is Eagan, Minnesota. The principal place of business of Jet Yard, LLC ("Jet Yard") and Jet Yard Solutions, LLC ("Jet Yard Solutions") is Marana, Arizona.

We maintain an Internet website at http://www.airt.net and our SEC filings may be accessed through links on our website. The information on our website is available for information purposes only and is not incorporated by reference in this Annual Report on Form 10-K.

Acquisitions.

Cadillac Casting, Inc. On November 8, 2019, the Company made an investment of \$2.8 million to purchase a 19.9% ownership stake in CCI. The Company determined that CCI is a variable interest entity and that the Company is not the primary beneficiary. This is primarily the result of the Company's conclusion that it does not have the power to direct the activities that most significantly impact the economic performance of CCI. Accordingly, the Company does not consolidate CCI and has determined to account for this investment using equity method accounting. See Notes to Consolidated Financial Statements included under Part II, Item 8 of this report.

Overnight Air Cargo.

The Company's Overnight Air Cargo segment is operated through MAC and CSA. MAC and CSA have a relationship with FedEx spanning over 40 years and represent two of seven companies in the U.S. that have North American feeder airlines under contract with FedEx. MAC and CSA operate and maintain Cessna Caravan, ATR-42 and ATR-72 aircraft that fly daily small-package cargo routes throughout the eastern United States and upper Midwest, and in the Caribbean. MAC and CSA's revenues are derived principally pursuant to "dry-lease" service contracts with FedEx. In these "dry-lease" contracts, FedEx provides the aircraft while MAC and CSA provide their own crew and exercise operational control of their flights.

On June 1, 2015, MAC and CSA entered into new dry-lease agreements with FedEx which together cover all of the aircraft operated by MAC and CSA and replaced all prior dry-lease service contracts. These dry-lease agreements provide for the lease of specified aircraft by MAC and CSA in return for the payment of monthly rent with respect to each aircraft leased, which monthly rent was increased from the prior dry-lease service contracts to reflect an estimate of a fair market rental rate. These dry-lease agreements provide that FedEx determines the type of aircraft and schedule of routes to be flown by MAC and CSA, with all other operational decisions made by MAC and CSA, respectively. The current dry-lease agreements provide for the reimbursement of MAC and CSA's costs by FedEx, without mark up, incurred in connection with the operation of the leased aircraft for the following: fuel, landing fees, third-party maintenance, parts and certain other direct operating costs. The current dry-lease agreement was most recently renewed on June 1, 2021 and is set to expire on August 31, 2026. The dry-lease agreements may be terminated by FedEx or MAC and CSA, respectively, at any time upon 90 days' written notice and FedEx may at any time terminate the lease of any particular aircraft thereunder upon 10 days' written notice. In addition, each of the dry-lease agreements provides that FedEx may terminate the agreement upon written notice if 60% or more of MAC or CSA's revenue (excluding revenues arising from reimbursement payments under the dry-lease agreement) is derived from the services performed by it pursuant to the respective dry-lease agreement, FedEx becomes MAC or CSA's only customer, or MAC or CSA employs fewer than six employees. As of the date of this report, FedEx would be permitted to terminate each of the drylease agreements under this provision. The Company believes that the short-term nature of its agreements with FedEx is standard within the airfreight contract delivery service industry, where performance is measured on a daily basis.

As of March 31, 2021, MAC and CSA had an aggregate of 66 aircraft under its dry-lease agreements with FedEx. Included within the 66 aircraft, 2 Cessna Caravan aircraft are considered soft-parked. Soft-parked aircraft remain covered under our agreements with FedEx although at a reduced administrative fee compared to aircraft that are in operation. MAC and CSA continue to perform maintenance on soft-parked aircraft, but they are not crewed and do not operate on scheduled routes.

Revenues from MAC and CSA's contracts with FedEx accounted for approximately 37% and 30% of the Company's consolidated revenue for the fiscal years ended March 31, 2021 and 2020, respectively. The loss of FedEx as a customer would have a material adverse effect on the Company. FedEx has been a customer of the Company since 1980. MAC and CSA are not contractually precluded from providing services to other parties and MAC occasionally provides third-party maintenance services to other airline customers and the U.S. military.

MAC and CSA operate under separate aviation certifications. MAC is certified to operate under Part 121, Part 135 and Part 145 of the regulations of the FAA. These certifications permit MAC to operate and maintain aircraft that can carry a maximum cargo capacity of 7,500 pounds on the Cessna Caravan 208B under Part 135 and a maximum cargo capacity of 14,000 pounds for the ATR-42 and 17,800 pounds for the ATR-72 aircraft under Part 121. CSA is certified to operate and maintain aircraft under Part 135 of the FAA regulations. This certification permits CSA to operate aircraft with a maximum cargo capacity of 7,500 pounds.

MAC and CSA, together, operated the following FedEx-owned cargo aircraft as of March 31, 2021:

Type of Aircraft	Model Year	Form of Ownership	<u>Number</u> of <u>Aircraft</u>
Cessna Caravan 208B (single turbo prop)	1985-1996	Dry lease	49
ATR-42 (twin turbo prop)	1992	Dry lease	8
ATR-72 (twin turbo prop)	1992	Dry lease	9
		_	
		_	66

The Cessna Caravan 208B aircraft are maintained under an FAA Approved Aircraft Inspection Program ("AAIP"). The inspection intervals range from 100 to 200 hours. The current engine overhaul period on the Cessna aircraft is 8,000 hours.

The ATR-42 and ATR-72 aircraft are maintained under a FAA Part 121 continuous airworthiness maintenance program. The program consists of A and C service checks as well as calendar checks ranging from weekly to 12 years in duration. The engine overhaul period is 6,000 hours.

MAC and CSA operate in a niche market within a highly competitive contract cargo carrier market. MAC and CSA are two of seven carriers that operate within the United States as FedEx feeder carriers. MAC and CSA are benchmarked against the other five FedEx feeders based on safety, reliability, compliance with federal, state and applicable foreign regulations, price and other service-related measurements. The Company believes accurate industry data is not available to indicate the Company's position within its marketplace (in large measure because all of the Company's direct competitors are privately held), but management believes that MAC and CSA, combined, constitute the largest contract carrier of the type described.

FedEx conducts periodic audits of MAC and CSA, and these audits are an integral part of the relationship between the carrier and FedEx. The audits test adherence to the dry-lease agreements and assess the carrier's overall internal control environment, particularly as related to the processing of invoices of FedEx-reimbursable costs. The scope of these audits typically extends beyond simple validation of invoice data against the third-party supporting documentation. The audit teams generally investigate the operator's processes and internal control procedures. The Company believes satisfactory audit results are critical to maintaining its relationship with FedEx. The audits conducted by FedEx are not designed to provide any assurance with respect to the Company's consolidated financial statements, and investors, in evaluating the Company's consolidated financial statements, should not rely in any way on any such examination of the Company or any of its subsidiaries.

The Company's overnight air cargo operations are not materially seasonal.

Ground Equipment Sales.

GGS is located in Olathe, Kansas and manufactures, sells and services aircraft deicers and other specialized equipment sold to domestic and international passenger and cargo airlines, ground handling companies, the United States Air Force ("USAF"), airports and industrial customers. GGS's product line includes aircraft deicers, scissor-type lifts, military and civilian decontamination units, flight-line tow tractors, glycol recovery vehicles and other specialized equipment. In the fiscal year ended March 31, 2021, sales of deicing equipment accounted for approximately 94% of GGS's revenues, compared to 89% in the prior fiscal year.

GGS designs and engineers its products. Components acquired from third-party suppliers are used in the assembly of its finished products. Components are sourced from a diverse supply chain. The primary components for mobile deicing equipment are the chassis (which is a commercial medium or heavy-duty truck), the fluid storage tank, a boom system, the fluid delivery system and heating equipment. The price of these components is influenced by raw material costs, principally high-strength carbon steels and stainless steel. GGS utilizes continuous improvements and other techniques to improve efficiencies and designs to minimize product price increases to its customers, to respond to regulatory changes, such as emission standards, and to incorporate technological improvements to enhance the efficiency of GGS's products. Improvements have included the development of single operator mobile deicing units to replace units requiring two operators, a patented premium deicing blend system and a more efficient forced-air deicing system.

GGS manufactures five basic models of mobile deicing equipment with capacities ranging from 700 to 2,800 gallons. GGS also offers fixed-pedestal-mounted deicers. Each model can be customized as requested by the customer, including single operator configuration, fire suppressant equipment, open basket or enclosed cab design, a patented forced-air deicing nozzle, on-board glycol blending system to substantially reduce glycol usage, and color and style of the exterior finish. GGS also manufactures five models of scissor-lift equipment, for catering, cabin service and maintenance service of aircraft, and has developed a line of decontamination equipment, flight-line tow tractors, glycol recovery vehicles and other special purpose mobile equipment.

GGS competes primarily on the basis of the quality and reliability of its products, prompt delivery, service and price. The market for aviation ground service equipment is highly competitive. Certain of GGS' competitors may have substantially greater financial resources than we do. These entities or investors may be able to accept more risk than the Company believes is in our best interest. In addition, the market for aviation ground services in the past has typically been directly related to the financial health of the aviation industry, weather patterns and changes in technology.

GGS's mobile deicing equipment business has historically been seasonal, with revenues typically being lower in the fourth and first fiscal quarters as commercial deicers are typically delivered prior to the winter season. The Company has continued its efforts to reduce GGS's seasonal fluctuation in revenues and earnings by broadening its international and domestic customer base and its product line.

In July 2009, GGS was awarded a new contract to supply deicing trucks to the USAF. Per the contract, GGS has to provide pricing that will be contractual for each one-year period within the years that the contract is awarded. Further, based upon volume of commercial items purchased during that year, there may be discounts calculated into the pricing and are reflective of the submitted pricing. This contract expired on July 13, 2020, and GGS has submitted its bid for contract renewal. As of March 31, 2021, the USAF has not yet responded to the bid.

GGS sold a total of 47 and 26 deicers under this contract with the USAF including both GL 1800 and ER 2875 models during fiscal years ended March 31, 2021 and March 31, 2020, respectively and all of the units were accepted by the USAF. GGS also completed and delivered an additional USAF delivery order for both GL 1800 and ER 2875 models during the first quarter of fiscal year 2022.

Commercial Jet Engines and Parts.

Contrail Aviation Support and Jet Yard (acquired during fiscal year 2017), AirCo (formed in May 2017), Worthington (acquired in May 2018), and Jet Yard Solutions (formed in January 2021) comprise the commercial jet engines and parts segment of the Company's operations. Contrail Aviation Support is a commercial aircraft trading, leasing and parts solutions provider. Its primary focus revolves around the CFM International CFM56-3/-5/-7 engines and the International Aero Engines V2500A5 engine, which power the two most prevalent narrow body, single aisle aircraft that are currently flown commercially—the Boeing 737 Classic / 737 NG and the Airbus A320 family. Contrail Aviation Support acquires commercial aircraft, jet engines and components for the purposes of sale, trading, leasing and disassembly/overhaul. Contrail Aviation holds an ASA-100 accreditation from the Aviation Suppliers Association. As of March 31, 2021 and March 31, 2020, Contrail contributed approximately 18% and 31% of the Company's total consolidated revenue for the years then ended, respectively.

Jet Yard and Jet Yard Solutions offer commercial aircraft storage, storage maintenance and aircraft disassembly/part-out services at facilities leased at the Pinal Air Park in Marana, Arizona. The prevailing climate in this area of Arizona provides conditions conducive to long-term storage of aircraft. Jet Yard Solutions is registered to operate a repair station under Part 145 of the regulations of the FAA. Jet Yard leases approximately 48.5 acres of land under a lease agreement with Pinal County, Arizona. Jet Yard was organized in 2014, entered into the lease in June 2016 and had maintained de minimus operations from formation through the date it was acquired by the Company. Effective January 1, 2021, Jet Yard subleased the aforementioned lease with Pinal County to Jet Yard Solutions.

AirCo operates an established business offering commercial aircraft parts sales, exchanges, procurement services, consignment programs and overhaul and repair services. AirCo Services, a wholly-owned subsidiary of AirCo ("AirCo Services"), holds FAA and European Aviation Safety Agency certifications covering aircraft instrumentation, avionics and a range of electrical accessories for civilian, military transport, regional/commuter and business/commercial jet and turboprop aircraft. Customers of AirCo include airlines and commercial aircraft leasing companies.

Worthington Aviation, like AirCo, operates an established business which supplies spare parts, repair programs and aircraft maintenance services to the global aviation community of regional and business aircraft fleets. Worthington offers a globally networked infrastructure and 24/7 support, ensuring fast delivery of spare parts and service, with four locations strategically located in the United States, United Kingdom & Australia. In addition, Worthington operates two FAA and EASA Certificated Repair Stations. The Tulsa maintenance, repair and overhaul ("MRO") facility provides composite aircraft structures, repair and support services. As a strategic resource for flight control, exhaust system and line replacement components, Worthington offers a wide array of services for complex operations. At the Eagan, Minnesota-based Repair Station, Worthington Repair Services offers a wide range of capabilities for repair and overhaul of airframe, accessories and power plant components in support of external as well as internal sales.

The Company's commercial jet engines and parts operations are not materially seasonal.

Backlog.

GGS's backlog consists of "firm" orders supported by customer purchase orders for the equipment sold by GGS. At March 31, 2021, GGS's backlog of orders was \$10.3 million, all of which GGS expects to be filled in the fiscal year ending March 31, 2022. At March 31, 2020, GGS's backlog of orders was \$51.5 million. Backlog is not meaningful for the Company's other business segments.

Governmental Regulation.

The Company and its subsidiaries are subject to regulation by various governmental agencies.

The Department of Transportation ("DOT") has the authority to regulate air service. The DOT has authority to investigate and institute proceedings to enforce its economic regulations, and may, in certain circumstances, assess civil penalties, revoke operating authority and seek criminal sanctions.

Under the Aviation and Transportation Security Act of 2001, as amended, the Transportation Security Administration ("TSA"), an agency within the Department of Homeland Security, has responsibility for aviation security. The TSA requires MAC and CSA to comply with a Full All-Cargo Aircraft Operator Standard Security Plan, which contains evolving and strict security requirements. These requirements are not static but change periodically as the result of regulatory and legislative requirements, imposing additional security costs and creating a level of uncertainty for our operations. It is reasonably possible that these rules or other future security requirements could impose material costs on us.

The FAA has safety jurisdiction over flight operations generally, including flight equipment, flight and ground personnel training, examination and certification, certain ground facilities, flight equipment maintenance programs and procedures, examination and certification of mechanics, flight routes, air traffic control and communications and other matters. The FAA is concerned with safety and the regulation of flight operations generally, including equipment used, ground facilities, maintenance, communications and other matters. The FAA can suspend or revoke the authority of air carriers or their licensed personnel for failure to comply with its regulations and can ground aircraft if questions arise concerning airworthiness. The FAA also has power to suspend or revoke for cause the certificates it issues and to institute proceedings for imposition and collection of fines for violation of federal aviation regulations. The Company, through its subsidiaries, holds all operating airworthiness and other FAA certificates that are currently required for the conduct of its business, although these certificates may be suspended or revoked for cause. The FAA periodically conducts routine reviews of MAC and CSA's operating procedures and flight and maintenance records.

The FAA has authority under the Noise Control Act of 1972, as amended, to monitor and regulate aircraft engine noise. The aircraft operated by the Company are in compliance with all such regulations promulgated by the FAA. Moreover, because the Company does not operate jet aircraft, noncompliance is not likely. Aircraft operated by us also comply with standards for aircraft exhaust emissions promulgated by the U.S. Environmental Protection Agency ("EPA") pursuant to the Clean Air Act of 1970, as amended.

Jet Yard, Jet Yard Solutions and AirCo, like Worthington, operate repair stations licensed under Part 145 of the regulations of the FAA. These certifications must be renewed annually, or in certain circumstances within 24 months. Certified repair stations are subject to periodic FAA inspection and audit. The repair station may not be relocated without written approval from the FAA.

Because of the extensive use of radio and other communication facilities in its aircraft operations, the Company is also subject to the Federal Communications Act of 1934, as amended.

Maintenance and Insurance.

The Company, through its subsidiaries, is required to maintain the aircraft it operates under the appropriate FAA and manufacturer standards and regulations.

The Company has secured public liability and property damage insurance in excess of minimum amounts required by the United States Department of Transportation.

The Company maintains cargo liability insurance, workers' compensation insurance and fire and extended coverage insurance for owned and leased facilities and equipment. In addition, the Company maintains product liability insurance with respect to injuries and loss arising from use of products sold and services provided.

In March 2014, the Company formed SAIC, a captive insurance company licensed in Utah. SAIC insures risks of the Company and its subsidiaries that were not previously insured by the various Company insurance programs (including the risk of loss of key customers and contacts, administrative actions and regulatory changes); and may from time to time underwrite third-party risk through certain reinsurance arrangements. SAIC is included within the Company's Corporate and other segment.

Employees.

As of March 31, 2021, the Company and its subsidiaries had 452 full-time and full-time-equivalent employees. None of the employees of the Company or any of its consolidated subsidiaries are represented by labor unions. The Company believes its relations with its employees are good.

General Business Risks

The novel coronavirus (COVID-19) and other possible pandemics and similar outbreaks could result in material adverse effects on our business, financial position, results of operations and cash flows.

The outbreak of the COVID-19 virus in the United States and elsewhere created considerable instability and disruption in the U.S. and world economies. Substantial uncertainty still surrounds COVID-19 and its potential effects, as well as the extent and effectiveness of any responses taken on a national and local level. Measures taken to limit the impact of COVID-19, including shelter-in-place orders, social distancing measures and other restrictions on travel, congregation and business operations resulted in significant negative impacts in the United States and world economies and in relation to our business. The long-term impact of COVID-19 on the U.S. and world economies remains uncertain and the duration and scope of the world-wide economic downturn cannot currently be predicted. The extent to which our financial condition, results of operations and overall value will continue to be affected by the COVID-19 pandemic will largely depend on future developments, which are highly uncertain and cannot be accurately predicted, including the scope, severity and duration of the pandemic, the actions taken to contain the pandemic or mitigate its impact, and the direct and indirect economic effects of the pandemic, containment and the effectiveness of vaccine measures, among others.

As a result of measures taken to limit the impact of COVID-19, self-quarantines or actual viral health issues, we initially experienced a substantial number of disruptions, and experienced a reduction in demand for commercial aircraft, jet engines and parts which negatively affected our sales and materially and adversely affected the financial performance and value of our inventory. All of the markets in which our businesses are located were subject to some level of restrictions on business operations. Even as travel advisories and restrictions are modified or lifted, demand for air travel could remain weak or not recover to pre-pandemic levels for a significant length of time, which may be a function of continued concerns over safety, unwillingness to travel, and decreased consumer spending due to economic conditions, including job losses. We cannot predict if and when the demand for our commercial aircraft, jet engines and parts will return to pre-outbreak levels of volume and pricing. The market and economic challenges created by the COVID-19 pandemic, and measures implemented to prevent its spread, adversely affected, and could continue to adversely affect our returns and profitability. As a result, the COVID-19 pandemic presents material uncertainty and risk with respect to our business, financial condition and results of operations. In addition, if in the future there is an outbreak of another highly infectious or contagious disease or other health concern, our company may be subject to similar risks as posed by COVID-19.

Market fluctuations may affect our operations.

Market fluctuations may affect our ability to obtain necessary funds for the operation of our businesses from current lenders or new borrowings. In addition, we may be unable to obtain financing on satisfactory terms, or at all. Third-party reports relating to market studies or demographics we obtained prior to the COVID-19 virus outbreak may no longer be accurate or complete. The occurrence of any of the foregoing events or any other related matters could materially and adversely affect our business, financial condition, results of operation and the overall value of our assets.

Labor inflation could impact our profitability.

The Company operates in industries that are heavily impacted by the workforce's labor rates. Significant examples include mechanics and pilots, both of which expose the Company to the possibility of material increases in labor costs.

We could experience significant increases in operating costs and reduced profitability due to competition for skilled management and staff employees in our operating businesses.

We compete with many other organizations for skilled management and staff employees, including organizations that operate in different market sectors than us. Costs to recruit and retain adequate personnel could adversely affect results of operations.

Legacy technology systems require a unique technical skillset which is becoming scarcer.

The Company deploys legacy technology systems in several significant business units. As technology continues to rapidly change, the available pool of individuals technically trained in and able to repair or perform maintenance on these legacy systems shrinks. As this scarcity increases, the Company's ability to efficiently and quickly repair its legacy systems becomes increasingly difficult, which could have a significant impact on the Company's day-to-day operations.

Our business may be adversely affected by information technology disruptions.

Our business may be impacted by information technology disruptions, including information technology attacks. Cybersecurity attacks, in particular, are evolving and include, but are not limited to, malicious software, attempts to gain unauthorized access to data, and other electronic security breaches that could lead to disruptions in systems, unauthorized release of confidential or otherwise protected information and corruption of data (our own or that of third parties). Although we have adopted certain measures to mitigate potential risks to our systems from information technology-related disruptions, given the unpredictability of the timing, nature and scope of such disruptions, we could potentially be subject to production downtimes, operational delays, other detrimental impacts on our operations or ability to provide products and services to our customers, the

compromising of confidential or otherwise protected information, misappropriation, destruction or corruption of data, security breaches, other manipulation or improper use of our systems or networks, financial losses from remedial actions, loss of business or potential liability, and/or damage to our reputation, any of which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

The failure of our information technology systems could adversely impact our reputation and financial performance.

We operate in businesses that are dependent on information systems and technology. Our information systems and technology may not continue to be able to accommodate our growth, and/or the cost of maintaining such systems may increase from its current level. Either scenario could have a material adverse effect on us. We rely on third-party service providers to manage certain aspects of our business, including for certain information systems and technology, data processing systems, and the secure processing, storage and transmission of information. Any interruption or deterioration in the performance of these third parties or failures of their information systems and technology could impair the quality of our operations and could adversely affect our business and reputation.

We may not be able to insure certain risks adequately or economically.

We cannot be certain that we will be able to insure all risks that we desire to insure economically or that all of our insurers or reinsurers will be financially viable if we make a claim. If an uninsured loss or a loss in excess of insured limits should occur, or if we are required to pay a deductible for an insured loss, results of operations could be adversely affected.

Legal liability may harm our business.

Many aspects of our businesses involve substantial risks of liability, and, in the normal course of business, we have been named as a defendant or co-defendant in lawsuits involving primarily claims for damages. The risks associated with potential legal liabilities often may be difficult to assess or quantify and their existence and magnitude often remain unknown for substantial periods of time. The expansion of our businesses, including expansions into new products or markets, impose greater risks of liability. In addition, unauthorized or illegal acts of our employees could result in substantial liability. Substantial legal liability could have a material adverse financial effect or cause us significant reputational harm, which in turn could seriously harm our businesses and our prospects. Although our current assessment is that there is no pending litigation that could have a significant adverse impact, if our assessment proves to be in error, then the outcome of such litigation could have a significant impact on our consolidated financial statements.

Our business might suffer if we were to lose the services of certain key employees.

Our business operations depend upon our key employees, including our executive officers. Loss of any of these employees, particularly our Chief Executive Officer, could have a material adverse effect on our business as our key employees have knowledge of our industry and customers that would be difficult to replace.

Risks Related to Our Segment Operations

The operating results of our four segments may fluctuate, particularly our commercial jet engine and parts segment.

The operating results of our four segments have varied from period to period and comparisons to results for preceding periods may not be meaningful. Due to a number of factors, including the risks described in this section, our operating results may fluctuate. These fluctuations may also be caused by, among other things:

- a. the economic health of the economy and the aviation industry in general;
- b. the timing and number of purchases and sales of engines or aircraft;
- c. the timing and amount of maintenance reserve revenues recorded resulting from the termination of long term leases, for which significant amounts of maintenance reserves may have accumulated;
- d. the termination or announced termination of production of particular aircraft and engine types;
- e. the retirement or announced retirement of particular aircraft models by aircraft operators;
- f. the operating history of any particular engine, aircraft or engine or aircraft model;
- g. the length of our operating leases; and
- h. the timing of necessary overhauls of engines and aircraft.

These risks may reduce our commercial jet engines and parts segment's engine utilization rates, lease margins, maintenance reserve revenues and proceeds from engine sales, and result in higher legal, technical, maintenance, storage and insurance costs related to repossession and the cost of engines being off-lease. As a result of the foregoing and other factors, the availability of engines for lease or sale periodically experiences cycles of oversupply and undersupply of given engine models and generally. The incidence of an oversupply of engines may produce substantial decreases in engine lease rates and the appraised and resale value of engines and may increase the time and costs incurred to lease or sell engines. We anticipate that supply fluctuations from period to period will continue in the future. As a result, comparisons to results from preceding periods may not be meaningful and results of prior periods should not be relied upon as an indication of our future performance.

Our Air Cargo Segment is dependent on a significant customer.

Our Air Cargo business is significantly dependent on a contractual relationship with FedEx Corporation ("FedEx"), the loss of which would have a material adverse effect on our business, results of operations and financial position. In the fiscal year ended March 31, 2021, 37% of our consolidated operating revenues, and 99% of the operating revenues for our overnight air cargo segment, arose from services we provided to FedEx. While FedEx has been our customer since 1980 under similar terms, our current agreements may be terminated by FedEx upon 90 days' written notice and FedEx may at any time terminate the lease of

any particular aircraft thereunder upon 10 days' written notice. In addition, FedEx may terminate the dry-lease agreement with MAC or CSA upon written notice if 60% or more of MAC or CSA's revenue (excluding revenues arising from reimbursement payments under the dry-lease agreement) is derived from the services performed by it pursuant to the respective dry-lease agreement, FedEx becomes its only customer, or either MAC or CSA employs less than six employees. As of the date of issuance of this report, FedEx would be permitted to terminate each of the dry-lease agreements under this provision. The loss of these contracts with FedEx would have a material adverse effect on our business, results of operations and financial position.

Our dry-lease agreements with FedEx subject us to operating risks.

Our dry-lease agreements with FedEx provide for the lease of specified aircraft by us in return for the payment of monthly rent with respect to each aircraft leased. The dry-lease agreements provide for the reimbursement by FedEx of our costs, without mark up, incurred in connection with the operation of the leased aircraft for the following: fuel, landing fees, third-party maintenance, parts and certain other direct operating costs. Under the dry-lease agreements, certain operational costs incurred by us in operating the aircraft are not reimbursed by FedEx at cost, and such operational costs are borne solely by us.

Because of our dependence on FedEx, we are subject to the risks that may affect FedEx's operations.

Because of our dependence on FedEx, we are subject to the risks that may affect FedEx's operations. These risks are discussed in FedEx's periodic reports filed with the SEC including its Annual Report on Form 10-K for the fiscal year ended May 31, 2020. These risks include but are not limited to the following:

- a. The negative effect of the COVID-19 pandemic;
- b. Economic conditions and anti-trade measures/trade policies and relations in the global markets in which it operates;
- c. Dependence on its strong reputation and value of its brand;
- d. Potential disruption to operations resulting from a significant data breach or other disruption to FedEx's technology infrastructure:
- e. The failure to efficiently integrate the business and operations of FedEx Express and TNT Express;
- f. The price and availability of fuel;
- g. FedEx's ability to manage capital and its assets, including aircraft, to match shifting and future shipping volumes;
- h. Changes in international trade policies and relations could significantly reduce the volume of goods transported globally;
- i. Intense competition from other providers of transportation and business services;
- i. Changes in governmental regulations that may affect its business;
- k. FedEx's ability to operate, integrate, leverage and grow acquired businesses;
- 1. Adverse changes in regulations and interpretations and challenges to its tax positions;
- m. Failure to attract and maintain employee talent or maintain company culture and its ability to maintain good relationships with its employees and prevent attempts by labor organizations to organize groups of its employees;
- n. Disruptions or modifications in service by the United States Postal Service, a significant customer and vendor of FedEx:
- o. The continued classification of owner-operators in its ground delivery business as independent contractors rather than as employees;
- p. The impact of proposed pilot flight and duty time regulations;
- q. The impact of the United Kingdom's withdrawal from the European Union;
- r. The impact of terrorist activities including the imposition of stricter governmental security requirements;
- s. Regulatory actions affecting global aviation rights or a failure to obtain or maintain aviation rights in important international markets;
- t. Global climate change or legal, regulatory or market responses to such change;
- u. Adverse weather or localized natural or man-made disasters in key locations, including its Memphis, Tennessee superhub.
- v. Constraints, volatility or disruption in the capital markets and any failure to maintain credit ratings and to meet credit agreement covenants; and
- w. Widespread outbreak of an illness or other communicable disease or any other public health crisis.

A material reduction in the aircraft we fly for FedEx could materially adversely affect our business and results of operations.

Under our agreements with FedEx, we are not guaranteed a number of aircraft or routes we are to fly and FedEx may reduce the number of aircraft we lease and operate upon 10 days' written notice. Our compensation under these agreements, including our administrative fees, depends on the number of aircraft leased to us by FedEx. Any material permanent reduction in the aircraft we operate could materially adversely affect our business and results of operations. A temporary reduction in any period could materially adversely affect our results of operations for that period.

Sales of deicing equipment can be affected by weather conditions.

Our deicing equipment is used to deice commercial and military aircraft. The extent of deicing activity depends on the severity of winter weather. Mild winter weather conditions permit airports to use fewer deicing units, since less time is required to deice aircraft in mild weather conditions. As a result, airports may be able to extend the useful lives of their existing units, reducing the demand for new units.

We are affected by the risks faced by commercial aircraft operators and MRO companies because they are our customers.

Commercial aircraft operators are engaged in economically sensitive, highly cyclical and competitive businesses. We are a supplier to commercial aircraft operators and MROs. As a result, we are indirectly affected by all of the risks facing commercial aircraft operators and MROs, with such risks being largely beyond our control. Our results of operations depend, in part, on the financial strength of our customers and our customers' ability to compete effectively in the marketplace and manage their risks.

Our engine values and lease rates, which are dependent on the status of the types of aircraft on which engines are installed, and other factors, could decline.

The value of a particular model of engine depends heavily on the types of aircraft on which it may be installed and the available supply of such engines. Values of engines generally tend to be relatively stable so long as there is sufficient demand for the host aircraft. However, the value of an engine may begin to decline rapidly once the host aircraft begins to be retired from service and/or used for spare parts in significant numbers. Certain types of engines may be used in significant numbers by commercial aircraft operators that are currently experiencing financial difficulties. If such operators were to go into liquidation or similar proceedings, the resulting over-supply of engines from these operators could have an adverse effect on the demand for the affected engine types and the values of such engines.

Upon termination of a lease, we may be unable to enter into new leases or sell the airframe, engine or its parts on acceptable terms.

We directly or indirectly own the engines or aircraft that we lease to customers and bear the risk of not recovering our entire investment through leasing and selling the engines or aircraft. Upon termination of a lease, we seek to enter a new lease or to sell or part-out the engine or aircraft. We also selectively sell engines on an opportunistic basis. We cannot give assurance that we will be able to find, in a timely manner, a lessee or a buyer for our engines or aircraft coming off-lease or for their associated parts. If we do find a lessee, we may not be able to obtain satisfactory lease rates and terms (including maintenance and redelivery conditions), and we cannot guarantee that the creditworthiness of any future lessee will be equal to or better than that of the existing lessees of our engines. Because the terms of engine leases may be less than 12 months, we may frequently need to remarket engines. We face the risk that we may not be able to keep our engines on lease consistently.

Failures by lessees to meet their maintenance and recordkeeping obligations under our leases could adversely affect the value of our leased engines and aircraft which could affect our ability to re-lease the engines and aircraft in a timely manner following termination of the leases.

The value and income producing potential of an engine or aircraft depends heavily on it being maintained in accordance with an approved maintenance system and complying with all applicable governmental directives and manufacturer requirements. In addition, for an engine or aircraft to be available for service, all records, logs, licenses and documentation relating to maintenance and operations of the engine or aircraft must be maintained in accordance with governmental and manufacturer specifications. Under our leases, our lessees are primarily responsible for maintaining our aircraft and engines and complying with all governmental requirements applicable to the lessee and the aircraft and engines, including operational, maintenance, government agency oversight, registration requirements and airworthiness directives. However, over time, certain lessees have experienced, and may experience in the future, difficulties in meeting their maintenance and recordkeeping obligations as specified by the terms of our leases. Failure by our lessees to maintain our assets in accordance with requirements could negatively affect the value and desirability of our assets and expose us to increased maintenance costs that may not be sufficiently covered by supplemental maintenance rents paid by such lessees.

Our ability to determine the condition of the engines or aircraft and whether the lessees are properly maintaining our assets is generally limited to the lessees' reporting of monthly usage and any maintenance performed, confirmed by periodic inspections performed by us and third-parties. A lessee's failure to meet its maintenance or recordkeeping obligations under a lease could result in:

- a. a grounding of the related engine or aircraft;
- b. a repossession that would likely cause us to incur additional and potentially substantial expenditures in restoring the engine or aircraft to an acceptable maintenance condition;
- a need to incur additional costs and devote resources to recreate the records prior to the sale or lease of the engine or aircraft;
- d. a decline in the market value of the aircraft or engine resulting in lower revenues upon a subsequent lease or sale;
- e. loss of lease revenue while we perform refurbishments or repairs and recreate records; and
- f. a lower lease rate and/or shorter lease term under a new lease entered into by us following repossession of the engine or aircraft.

Any of these events may adversely affect the value of the engine, unless and until remedied, and reduce our revenues and increase our expenses. If an engine is damaged during a lease and we are unable to recover from the lessee or though insurance, we may incur a loss.

We may experience losses and delays in connection with repossession of engines or aircraft when a lessee defaults.

We may not be able to repossess an engine or aircraft when the lessee defaults, and even if we are able to repossess the engine or aircraft, we may have to expend significant funds in the repossession, remarketing and leasing of the asset. When a lessee defaults and such default is not cured in a timely manner, we typically seek to terminate the lease and repossess the engine or aircraft. If a defaulting lessee contests the termination and repossession or is under court protection, enforcement of our rights under the lease may be difficult, expensive and time-consuming. We may not realize any practical benefits from our legal rights and we may need to obtain consents to export the engine or aircraft. As a result, the relevant asset may be off-lease or not producing revenue for a prolonged period of time. In addition, we will incur direct costs associated with repossessing our engine or aircraft, including, but not limited to, legal and similar costs, the direct costs of transporting, storing and insuring the engine or aircraft, and costs associated with necessary maintenance and recordkeeping to make the asset available for lease or

sale. During this time, we will realize no revenue from the leased engine or aircraft, and we will continue to be obligated to pay any debt financing associated with the asset. If an engine is installed on an airframe, the airframe may be owned by an aircraft lessor or other third party. Our ability to recover engines installed on airframes may depend on the cooperation of the airframe owner

Our commercial jet engine and parts segment and its customers operate in a highly regulated industry and changes in laws or regulations may adversely affect our ability to lease or sell our engines or aircraft.

Certain of the laws and regulations applicable to our business, include:

<u>Licenses and consents</u>. A number of our leases require specific governmental or regulatory licenses, consents or approvals. These include consents for certain payments under the leases and for the export, import or re-export of our engines or aircraft. Consents needed in connection with future leasing or sale of our engines or aircraft may not be received timely or have economically feasible terms. Any of these events could adversely affect our ability to lease or sell engines or aircraft.

Export/import regulations. The U.S. Department of Commerce (the "Commerce Department") regulates exports. We are subject to the Commerce Department's and the U.S. Department of State's regulations with respect to the lease and sale of engines and aircraft to foreign entities and the export of related parts. These Departments may, in some cases, require us to obtain export licenses for engines exported to foreign countries. The U.S. Department of Homeland Security, through the U.S. Customs and Border Protection, enforces regulations related to the import of engines and aircraft into the United States for maintenance or lease and imports of parts for installation on our engines and aircraft.

Restriction Lists. We are prohibited from doing business with persons designated by the U.S. Department of the Treasury's Office of Foreign Assets Control ("OFAC") on its "Specially Designated Nationals List," and must monitor our operations and existing and potential lessees and other counterparties for compliance with OFAC's rules. Similarly, sanctions issued by the United Nations, the U.S. government, the European Union or other foreign governments could prohibit or restrict us from doing business in certain countries or with certain persons. As a result, we must monitor our operations and existing and potential lessees and other counterparties for compliance with such sanctions.

Anti-corruption Laws. As a U.S. corporation with international operations, we are required to comply with a number of U.S. and international laws and regulations which combat corruption. For example, the U.S. Foreign Corrupt Practices Act (the "FCPA") and similar world-wide anti-bribery laws generally prohibit improper payments to foreign officials for the purpose of influencing any official act or decision or securing any improper advantage. The scope and enforcement of such anti-corruption laws and regulations may vary. Although our policies expressly mandate compliance with the FCPA and similarly applicable laws, there can be no assurance that none of our employees or agents will take any action in violation of our policies. Violations of such laws or regulations could result in substantial civil or criminal fines or penalties. Actual or alleged violations could also damage our reputation, be expensive to defend, and impair our ability to do business.

<u>Civil aviation regulation</u>. Users of engines and aircraft are subject to general civil aviation authorities, including the FAA and the EASA, who regulate the maintenance of engines and issue airworthiness directives. Airworthiness directives typically set forth special maintenance actions or modifications to certain engine and aircraft types or a series of specific engines that must be implemented for the engine or aircraft to remain in service. Also, airworthiness directives may require the lessee to make more frequent inspections of an engine, aircraft or particular engine parts. Each lessee of an engine or aircraft generally is responsible for complying with all airworthiness directives. However, if the engine or aircraft is off lease, we may be forced to bear the cost of compliance with such airworthiness directives. Additionally, even if the engine or aircraft is leased, subject to the terms of the lease, if any, we may still be forced to share the cost of compliance.

Our aircraft, engines and parts could cause damage resulting in liability claims.

Our aircraft, engines or parts could cause bodily injury or property damage, exposing us to liability claims. Our leases require our lessees to indemnify us against these claims and to carry insurance customary in the air transportation industry, including general liability and property insurance at agreed upon levels. However, we cannot guarantee that one or more catastrophic events will not exceed insurance coverage limits or that lessees' insurance will cover all claims that may be asserted against us. Any insurance coverage deficiency or default by lessees under their indemnification or insurance obligations may reduce our recovery of losses upon an event of loss.

We have risks in managing our portfolio of aircraft and engines to meet customer needs.

The relatively long life cycles of aircraft and jet engines can be shortened by world events, government regulation or customer preferences. We seek to manage these risks by trying to anticipate demand for particular engine and aircraft types, maintaining a portfolio mix of engines that we believe is diversified, has long-term value and will be sought by lessees in the global market for jet engines, and by selling engines and aircraft that we expect will not experience obsolescence or declining usefulness in the foreseeable future. There is no assurance that the engine and aircraft types owned or acquired by us will meet customer demand.

<u>Liens on our engines or aircraft could exceed the value of such assets, which could negatively affect our ability to repossess, lease or sell a particular engine or aircraft.</u>

Liens that secure the payment of repairers' charges or other liens may, depending on the jurisdiction, attach to engines and aircraft. Engines also may be installed on airframes to which liens unrelated to the engines have attached. These liens may secure substantial sums that may, in certain jurisdictions or for certain types of liens, exceed the value of the particular engine or aircraft to which the liens have attached. In some jurisdictions, a lien may give the holder the right to detain or, in limited

cases, sell or cause the forfeiture of the engine or aircraft. Such liens may have priority over our interest as well as our creditors' interest in the engines or aircraft. These liens and lien holders could impair our ability to repossess and lease or sell the engines or aircraft. We cannot give assurance that our lessees will comply with their obligations to discharge third-party liens on our assets. If they do not, we may, in the future, find it necessary to pay the claims secured by such liens to repossess such assets.

In certain countries, an engine affixed to an aircraft may become an addition to the aircraft and we may not be able to exercise our ownership rights over the engine.

In certain jurisdictions, an engine affixed to an aircraft may become an addition to the aircraft such that the ownership rights of the owner of the aircraft supersede the ownership rights of the owner of the engine. If an aircraft is security for the owner's obligations to a third-party, the security interest in the aircraft may supersede our rights as owner of the engine. Such a security interest could limit our ability to repossess an engine located in such a jurisdiction in the event of a lessee bankruptcy or lease default. We may suffer a loss if we are not able to repossess engines leased to lessees in these jurisdictions.

Higher or volatile fuel prices could affect the profitability of the aviation industry and our lessees' ability to meet their lease payment obligations to us.

Historically, fuel prices have fluctuated widely depending primarily on international market conditions, geopolitical and environmental factors and events and currency exchange rates. Natural and other disasters can also significantly affect fuel availability and prices. The cost of fuel represents a major expense to airlines that is not within their control, and significant increases in fuel costs or hedges that inaccurately assess the direction of fuel costs can materially and adversely affect their operating results. Due to the competitive nature of the aviation industry, operators may be unable to pass on increases in fuel prices to their customers by increasing fares in a manner that fully offsets the increased fuel costs they may incur. In addition, they may not be able to manage this risk by appropriately hedging their exposure to fuel price fluctuations. The profitability and liquidity of those airlines that do hedge their fuel costs can also be adversely affected by swift movements in fuel prices if such airlines are required to post cash collateral under hedge agreements. Therefore, if for any reason fuel prices return to historically high levels or show significant volatility, our lessees are likely to incur higher costs or generate lower revenues, which may affect their ability to meet their obligations to us.

<u>Interruptions in the capital markets could impair our lessees' ability to finance their operations, which could prevent the lessees from complying with payment obligations to us.</u>

The global financial markets can be highly volatile and the availability of credit from financial markets and financial institutions can vary substantially depending on developments in the global financial markets. Our lessees depend on banks and the capital markets to provide working capital and to refinance existing indebtedness. To the extent such funding is unavailable, or available only on unfavorable terms, and to the extent financial markets do not provide equity financing as an alternative, our lessees' operations and operating results may be materially and adversely affected and they may not comply with their respective payment obligations to us.

Our lessees may fail to adequately insure our aircraft or engines which could subject us to additional costs.

While an aircraft or engine is on lease, we do not directly control its operation. Nevertheless, because we hold title to the aircraft or engine, we could, in certain jurisdictions, be held liable for losses resulting from its operation. At a minimum, we may be required to expend resources in our defense. We require our lessees to obtain specified levels of insurance and indemnify us for, and insure against, such operational liabilities. However, some lessees may fail to maintain adequate insurance coverage during a lease term, which, although constituting a breach of the lease, would require us to take some corrective action, such as terminating the lease or securing insurance for the aircraft or engines. Therefore, our lessees' insurance coverage may not be sufficient to cover all claims that could be asserted against us arising from the operation of our aircraft or engines. Inadequate insurance coverage or default by lessees in fulfilling their indemnification or insurance obligations to us will reduce the insurance proceeds that we would otherwise be entitled to receive in the event we are sued and are required to make payments to claimants. Moreover, our lessees' insurance coverage is dependent on the financial condition of insurance companies and their ability to pay claims. A reduction in insurance proceeds otherwise payable to us as a result of any of these factors could materially and adversely affect our financial results.

If our lessees fail to cooperate in returning our aircraft or engines following lease terminations, we may encounter obstacles and are likely to incur significant costs and expenses conducting repossessions.

Our legal rights and the relative difficulty of repossession vary significantly depending on the jurisdiction in which an aircraft or engines are located. We may need to obtain a court order or consents for de-registration or re-export, a process that can differ substantially from country to country. When a defaulting lessee is in bankruptcy, protective administration, insolvency or similar proceedings, additional limitations may also apply. For example, certain jurisdictions give rights to the trustee in bankruptcy or a similar officer to assume or reject the lease, to assign it to a third party, or to entitle the lessee or another third party to retain possession of the aircraft or engines without paying lease rentals or performing all or some of the obligations under the relevant lease. Certain of our lessees are partially or wholly owned by government-related entities, which can further complicate our efforts to repossess our aircraft or engines in that government's jurisdiction. If we encounter any of these difficulties, we may be delayed in, or prevented from, enforcing certain of our rights under a lease and in re-leasing the affected aircraft or engines. When conducting a repossession, we are likely to incur significant costs and expenses that are unlikely to be recouped. These include legal and other expenses related to legal proceedings, including the cost of posting security bonds or letters of credit necessary to effect repossession of the aircraft or engines, particularly if the lessee is contesting the proceedings or is in bankruptcy. We must absorb the cost of lost revenue for the time the aircraft or engines are off-lease. We may incur substantial maintenance, refurbishment or repair costs that a defaulting lessee has failed to pay and are necessary to put the aircraft or engines in suitable condition for re-lease or sale. We may also incur significant costs in retrieving or recreating aircraft records

required for registration of the aircraft and in obtaining the certificate of airworthiness for an aircraft. It may be necessary to pay to discharge liens or pay taxes and other governmental charges on the aircraft to obtain clear possession and to remarket the aircraft effectively, including, in some cases, liens that the lessee may have incurred in connection with the operation of its other aircraft. We may also incur other costs in connection with the physical possession of the aircraft or engines.

If our lessees fail to discharge aircraft liens for which they are responsible, we may be obligated to pay to discharge the liens.

In the normal course of their businesses, our lessees are likely to incur aircraft and engine liens that secure the payment of airport fees and taxes, custom duties, Eurocontrol and other air navigation charges, landing charges, crew wages, and other liens that may attach to our aircraft. Aircraft may also be subject to mechanic's liens as a result of routine maintenance performed by third parties on behalf of our customers. Some of these liens can secure substantial sums, and if they attach to entire fleets of aircraft, as permitted for certain kinds of liens, they may exceed the value of the aircraft itself. Although the financial obligations relating to these liens are the contractual responsibility of our lessees, if they fail to fulfill their obligations, the liens may ultimately become our financial responsibility. Until they are discharged, these liens could impair our ability to repossess, re-lease or sell our aircraft or engines. In some jurisdictions, aircraft and engine liens may give the holder thereof the right to detain or, in limited cases, sell or cause the forfeiture of the aircraft. If we are obliged to pay a large amount to discharge a lien, or if we are unable take possession of our aircraft subject to a lien in a timely and cost-effective manner, it could materially and adversely affect our financial results.

If our lessees encounter financial difficulties and we restructure or terminate our leases, we are likely to obtain less favorable lease terms.

If a lessee delays, reduces, or fails to make rental payments when due, or has advised us that it will do so in the future, we may elect or be required to restructure or terminate the lease. A restructured lease will likely contain terms that are less favorable to us. If we are unable to agree on a restructuring and we terminate the lease, we may not receive all or any payments still outstanding, and we may be unable to re-lease the aircraft or engines promptly and at favorable rates, if at all.

Withdrawal, suspension or revocation of governmental authorizations or approvals could negatively affect our business.

We are subject to governmental regulation and our failure to comply with these regulations could cause the government to withdraw or revoke our authorizations and approvals to do business and could subject us to penalties and sanctions that could harm our business. Governmental agencies throughout the world, including the FAA, highly regulate the manufacture, repair and operation of aircraft operated in the United States and equivalent regulatory agencies in other countries, such as the EASA in Europe, regulate aircraft operated in those countries. With the aircraft, engines and related parts that we purchase, lease and sell to our customers, we include documentation certifying that each part complies with applicable regulatory requirements and meets applicable standards of airworthiness established by the FAA or the equivalent regulatory agencies in other countries. Specific regulations vary from country to country, although regulatory requirements in other countries are generally satisfied by compliance with FAA requirements. With respect to a particular engine or engine component, we utilize FAA and/or EASA certified repair stations to repair and certify engines and components to ensure marketability. The revocation or suspension of any of our material authorizations or approvals would have an adverse effect on our business, financial condition and results of operations. New and more stringent government regulations, if enacted, could have an adverse effect on our business, financial condition and results of operations. In addition, certain product sales to foreign countries require approval or licensing from the U.S. government. Denial of export licenses could reduce our sales to those countries and could have a material adverse effect on our business.

Risks Related to Our Structure and Financing/Liquidity Risks

Our holding company structure may increase risks related to our operations.

Our business, financial condition and results of operations are dependent upon those of our individual businesses, and our aggregate investment in particular industries. We are a holding company with investments in businesses and assets in a number of industries. Our business, financial condition and results of operations are dependent upon our various businesses and investments and their management teams. Each of our businesses generally operate independently and in a decentralized manner. Additionally, in the ordinary course of businesses we guarantee the obligations of entities that we manage and/or invest in. Any material adverse change in one of our businesses, investments or management teams, or in a particular industry in which we operate or invest, may cause material adverse changes to our business, financial condition and results of operations. The more capital we devote to a particular investment or industry may increase the risk that such investment could significantly impact our financial condition and results of operations, possibly in a material adverse way.

A small number of stockholders has the ability to control the Company.

We have a very concentrated stockholder base. As of March 31, 2021, our three largest stockholders beneficially owned or had the ability to direct the voting of shares of our common stock representing approximately 62% of the outstanding shares. As a result, these stockholders have the power to determine the outcome of substantially all matters submitted to our stockholders for approval, including the election of our board of directors. In addition, future sales by these stockholders of substantial amounts of our common stock, or the potential for such sales, could adversely affect the prevailing market price of our securities.

An increase in interest rates or in our borrowing margin would increase the cost of servicing our debt and could reduce our cash flow and negatively affect the results of our business operations.

A portion of our outstanding debt bears interest at floating rates. As a result, to the extent we have not hedged against rising interest rates, an increase in the applicable benchmark interest rates would increase the cost of servicing our debt and could materially and adversely affect our results of operations, financial condition, liquidity and cash flows. In addition, if we refinance our indebtedness and interest rates or our borrowing margins increase between the time an existing financing arrangement was consummated and the time such financing arrangement is refinanced, the cost of servicing our debt would increase and our results of operations, financial condition, liquidity and cash flows could be materially and adversely affected.

Our inability to maintain sufficient liquidity could limit our operational flexibility and also impact our ability to make payments on our obligations as they come due.

In addition to being capital intensive and highly leveraged, our aircraft and engine business requires that we maintain sufficient liquidity to enable us to contribute the non-financed portion of engine and aircraft purchases as well as to service our payment obligations to our creditors as they become due, despite the fact that the timing and amounts of our revenues do not match the timing under our debt service obligations. Our restricted cash is unavailable for general corporate purposes. Accordingly, our ability to successfully execute our business strategy and maintain our operations depends on our ability to continue to maintain sufficient liquidity, cash and available credit under our credit facilities. Our liquidity could be adversely impacted if we are subjected to one or more of the following:

- a significant decline in revenues,
- a material increase in interest expense that is not matched by a corresponding increase in revenues,
- · a significant increase in operating expenses,
- a reduction in our available credit under our credit facilities, or
- general economic or national events.

If we do not maintain sufficient liquidity, our ability to meet our payment obligations to creditors or to borrow additional funds could become impaired.

Future cash flows from operations or through financings may not be sufficient to enable the Company to meet its obligations.

Future cash flow of the Company's operations can fluctuate significantly. If future cash flows are not sufficient to permit the Company to meet its obligations, this would likely have a material adverse effect on the Company, its businesses, financial condition and results of operations. Additionally, credit market volatility may affect our ability to refinance our existing debt, borrow funds under our existing lines of credit or incur additional debt - certain of which mature in the next twelve months. There can be no assurance that the Company or its subsidiaries will continue to have access to their lines of credit if their financial performance does not satisfy the financial covenants set forth in the applicable financing agreements. If the Company or its subsidiaries do not meet certain of its financial covenants, and if they are unable to secure necessary waivers or other amendments from the respective lenders on terms acceptable to management and to renew or replace financing arrangements that mature during the current fiscal year, their ability to access available lines of credit could be limited, their debt obligations could be accelerated by the respective lenders and liquidity could be adversely affected.

The Company and/or its subsidiaries may be required to seek additional or alternative financing sources if the Company's or its subsidiaries' cash needs are significantly greater than anticipated or they do not materially meet their business plans, or there are unanticipated downturns in the markets for the Company's and its subsidiaries' products and services. Future disruption and volatility in credit market conditions could have a material adverse impact on the Company's ability, or that of its subsidiaries, to refinance debt when it comes due on terms similar to our current credit facilities, to draw upon existing lines of credit or to incur additional debt if needed. There can be no assurance therefore that such financing will be available or available on acceptable terms. The inability to generate sufficient cash flows from operations or through financings or disruptions in the credit markets could impair the Company's or its subsidiaries' liquidity and would likely have a material adverse effect on their businesses, financial condition and results of operations.

A large proportion of our capital is invested in physical assets and securities that can be hard to sell, especially if market conditions are poor.

Because our investment strategy can involve public company securities, we may be restricted in our ability to effect sales during certain time periods. A lack of liquidity could limit our ability to vary our portfolio or assets promptly in response to changing economic or investment conditions. Additionally, if financial or operating difficulties of other competitors result in distress sales, such sales could depress asset values in the markets in which we operate. The restrictions inherent in owning physical assets could reduce our ability to respond to changes in market conditions and could adversely affect the performance of our investments, our financial condition and results of operations. Because there is significant uncertainty in the valuation of, or in the stability of the value of illiquid or non-public investments, the fair values of such investments do not necessarily reflect the prices that would actually be obtained when such investments are realized.

To service our debt and meet our other cash needs, we will require a significant amount of cash, which may not be available.

Our ability to make payments on, or repay or refinance, our debt, will depend largely upon our future operating performance. Our future performance, to a certain extent, is subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control. In addition, our ability to borrow funds in the future to make payments on our debt will depend on our maintaining specified financial ratios and satisfying financial condition tests and other covenants in the agreements governing our debt. Our business may not generate sufficient cash flow from operations and future borrowings may not be available in amounts sufficient to pay our debt and to satisfy our other liquidity needs.

If our cash flows and capital resources are insufficient to fund our debt service obligations, we may be forced to seek alternatives.

If we cannot meet our debt service obligations, we may be forced to reduce or delay investments and aircraft or engine purchases, sell assets, seek additional capital or restructure or refinance our indebtedness. Our ability to restructure or refinance our debt will depend on the condition of the capital markets and our financial condition at such time. Any refinancing of our debt could be at higher interest rates and might require us to comply with more onerous covenants, which could further restrict our business operations. The terms of our debt instruments may restrict us from adopting some of these alternatives. These alternative measures may not be successful and may not permit us to meet our scheduled debt service obligations or to meet our aircraft or engine purchase commitments as they come due.

The transition away from LIBOR may adversely affect our cost to obtain financing and may potentially negatively impact our interest rate swap agreements.

It is expected that a transition away from the widespread use of London Interbank Offered Rate ("LIBOR") to alternative rates will occur over the course of the next few years. The Federal Reserve Bank of New York and various other authorities have commenced the publication of reforms and actions relating to alternatives to U.S. dollar LIBOR. The full impact of such reforms and actions, together with any transition away from LIBOR remains unclear. These changes may have a material adverse impact on the availability and cost of our financing, including LIBOR-based loans, as well as our interest rate swap agreements.

Despite our substantial indebtedness, we might incur significantly more debt, and cash may not be available to meet our financial obligations when due or enable us to capitalize on investment opportunities when they arise.

We employ debt and other forms of leverage in the ordinary course of business to enhance returns to our investors and finance our operations, and despite our current indebtedness levels, we expect to incur additional debt in the future to finance our operations, including purchasing aircraft and engines and meeting our contractual obligations as the agreements relating to our debt, including our indentures, term loan facilities, revolving credit facilities, and other financings do not entirely prohibit us from incurring additional debt. We also enter into financing commitments in the normal course of business, which we may be required to fund. If we are required to fund these commitments and are unable to do so, we could be liable for damages pursued against us or a loss of opportunity through default under contracts that are otherwise to our benefit could occur. We are therefore subject to the risks associated with debt financing and refinancing, including but not limited to the following: (i) our cash flow may be insufficient to meet required payments of principal and interest; (ii) payments of principal and interest on borrowings may leave us with insufficient cash resources to pay operating expenses and dividends; (iii) if we are unable to obtain committed debt financing for potential acquisitions or can only obtain debt at high interest rates or on other unfavorable terms, we may have difficulty completing acquisitions or may generate profits that are lower than would otherwise be the case; (iv) we may not be able to refinance indebtedness at maturity due to company and market factors such as the estimated cash flow produced by our assets, the value of our assets, liquidity in the debt markets, and/or financial, competitive, business and other factors; and (v) if we are able to refinance our indebtedness, the terms of a refinancing may not be as favorable as the original terms for such indebtedness. If we are unable to refinance our indebtedness on acceptable terms, or at all, we may need to utilize available liquidity, which would reduce our ability to pursue new investment opportunities, dispose of one or more of our assets on disadvantageous terms, or raise equity, causing dilution to existing stockholders.

The terms of our various credit agreements and other financing documents also require us to comply with a number of customary financial and other covenants, such as maintaining debt service coverage and leverage ratios, adequate insurance coverage and certain credit ratings. These covenants may limit our flexibility in conducting our operations and breaches of these covenants could result in defaults under the instruments governing the applicable indebtedness, even if we have satisfied and continue to satisfy our payment obligations. Regulatory changes may also result in higher borrowing costs and reduced access to credit.

Future acquisitions and dispositions of businesses and investments are possible, changing the components of our assets and liabilities, and if unsuccessful or unfavorable, could reduce the value of the Company and its securities.

Any future acquisitions or dispositions may result in significant changes in the composition of our assets and liabilities, as well as our business mix and prospects. Consequently, our financial condition, results of operations and the trading price of our securities may be affected by factors different from those affecting our financial condition, results of operations and trading price at the present time.

We face numerous risks and uncertainties as we expand our business.

We expect the growth and development of our business to come primarily from internal expansion and through acquisitions, investments, and strategic partnering. As we expand our business, there can be no assurance that financial controls, the level and knowledge of personnel, operational abilities, legal and compliance controls and other corporate support systems will be adequate to manage our business and growth. The ineffectiveness of any of these controls or systems could adversely affect our business and prospects. In addition, if we acquire new businesses and/or introduce new products, we face numerous risks and uncertainties concerning the integration of their controls and systems, including financial controls, accounting and data processing systems, management controls and other operations. A failure to integrate these systems and controls, and even an inefficient integration of these systems and controls, could adversely affect our business and prospects.

Our business strategy includes acquisitions, and acquisitions entail numerous risks, including the risk of management diversion and increased costs and expenses, all of which could negatively affect the Company's ability to operate profitably.

Our business strategy includes, among other things, strategic and opportunistic acquisitions. This element of our strategy entails several risks, including, but not limited to the diversion of management's attention from other business concerns and the need to finance such acquisitions with additional equity and/or debt. In addition, once completed, acquisitions entail further risks, including: unanticipated costs and liabilities of the acquired businesses, including environmental liabilities, that could materially adversely affect our results of operations; difficulties in assimilating acquired businesses, preventing the expected benefits from the transaction from being realized or achieved within the anticipated time frame; negative effects on existing business relationships with suppliers and customers; and losing key employees of the acquired businesses. If our acquisition strategy is not successful or if acquisitions are not well integrated into our existing operations, the Company's operations and business results could be negatively affected.

Strategic ventures may increase risks applicable to our operations.

We may enter into strategic ventures that pose risks, including a lack of complete control over the enterprise, and other potential unforeseen risks, any of which could adversely impact our financial results. We may occasionally enter into strategic ventures or investments with third parties in order to take advantage of favorable financing opportunities, to share capital or operating risk, or to earn aircraft management fees. These strategic ventures and investments may subject us to various risks, including those arising from our possessing limited decision-making rights in the enterprise or over the related aircraft. If we were unable to resolve a dispute with a strategic partner in such a venture that retains material managerial veto rights, we might reach an impasse which may lead to operational difficulties in the venture and increases costs or the liquidation of our investment at a time and in a manner that would result in our losing some or all of our original investment and/or the occurrence of other losses, which could adversely impact our financial results.

Rapid business expansions or new business initiatives may increase risk.

Certain business initiatives, including expansions of existing businesses such as the relatively recent substantial expansion at our commercial jet engines and parts segment and the establishment of a large aircraft asset management business and a new aircraft capital joint venture, may bring us into contact, directly or indirectly, with individuals and entities that are not within our traditional client and counterparty base and may expose us to new asset classes, new business plans and new markets. These business activities expose us to new and enhanced risks, greater regulatory scrutiny of these activities, increased credit-related, sovereign and operational risks, and reputational concerns regarding the manner in which these assets are being operated or held. There is no assurance that prior year activity and results will occur in future periods.

Our policies and procedures may not be effective in ensuring compliance with applicable law.

Our policies and procedures designed to ensure compliance with applicable laws may not be effective in all instances to prevent violations. We could become subject to various governmental investigations, audits and inquiries, both formal and informal. Such investigations, regardless of their outcome, could be costly, divert management attention, and damage our reputation. The unfavorable resolution of such investigations could result in criminal liability, fines, penalties or other monetary or nonmonetary sanctions and could materially affect our business or results of operations.

Compliance with the regulatory requirements imposed on us as a public company results in significant costs that may have an adverse effect on our results.

As a public company, we are subject to various regulatory requirements including, but not limited to, compliance with the rules and regulations of the Securities Act of 1933, as amended and the Securities Exchange Act of 1934, as amended, including the Sarbanes-Oxley Act of 2002 and the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. Compliance with these rules and regulations results in significant additional costs to us both directly, through increased audit and consulting fees, and indirectly, through the time required by our limited resources to address such regulations.

Deficiencies in our public company financial reporting and disclosures could adversely impact our reputation.

As we expand the size and scope of our business, there is a greater susceptibility that our financial reporting and other public disclosure documents may contain material misstatements and that the controls we maintain to attempt to ensure the complete accuracy of our public disclosures may fail to operate as intended. The occurrence of such events could adversely impact our reputation and financial condition. Management is responsible for establishing and maintaining adequate internal controls over financial reporting to give our stakeholders assurance regarding the reliability of our financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles ("GAAP"). However, the process for establishing and maintaining adequate internal controls over financial reporting has inherent limitations, including the possibility of human error. Our internal controls over financial reporting may not prevent or detect misstatements in our financial disclosures on a timely basis, or at all. Some of these processes may be new for certain subsidiaries in our structure, and in the case of acquisitions, may take time to be fully implemented. Our disclosure controls and procedures are designed to provide assurance that information required to be disclosed by us in reports filed or submitted under U.S. securities laws is recorded, processed, summarized and reported within the required time periods. Our policies and procedures governing disclosures may not ensure that all material information regarding us is disclosed in a proper and timely fashion or that we will be successful in preventing the disclosure of material information to a single person or a limited group of people before such information is generally disseminated.

Risks Related to Our Investments in Securities

Our results of operations may be affected by the value of securities we hold for investment and we may be unable to liquidate our investments in a timely manner or at full value.

We invest a significant portion of our capital not needed for operations in marketable securities, including equity securities of publicly-traded companies. At March 31, 2021, the fair value of these marketable securities was approximately \$2.9 million. The value of our investment portfolio fluctuates and we have sustained losses in our investment portfolio in the past and could in the future. Such declines in value of available-for-sale securities will be recognized as losses upon the sale of such securities or if such declines are deemed to be other than temporary. Our results of operations may be affected by gains or losses recognized upon such a decline in value of our investments or the sale of these investments and the Company may not be able to realize the fair value of such investments under then-market conditions if liquidation is necessary in a short period of time.

Item 1B. Unresolved Staff Comments

Not applicable.

Item 2. Properties.

The Company owns approximately 4.626 acres in Denver, North Carolina, which houses the operations of Air T and MAC.

The Company leases approximately 1,950 square feet of office space and approximately 4,800 square feet of hangar space at the Ford Airport in Iron Mountain, Michigan. CSA's operations are headquartered at these facilities which are leased from a third party under an annually renewable agreement.

The Company leases approximately 53,000 square feet of a 66,000 square foot aircraft maintenance facility located in Kinston, North Carolina under an agreement that extends through January 2023, with the option to extend the lease for four additional five-year periods thereafter. The rental rate under the lease increases by increments for each of the five-year renewal periods.

GGS leases an 112,500 square foot production facility in Olathe, Kansas. The facility is leased from a third party under a lease agreement, which expires in August 2024.

As of March 31, 2021, the Company leased hangar, maintenance and office space from third parties at a variety of other locations, at prevailing market terms.

Contrail Aviation leases a 21,000 square foot facility in Verona, Wisconsin. This is a lease from a related party. See Note 14 "Related Party Matters" of Notes to Consolidated Financial Statements included under Part II, Item 8 of this report. As of March 31, 2021, Contrail has executed the option to extend this lease for an additional period of five years on the same terms and conditions. The new lease expires on July 17, 2026. Contrail also leases a 1,453 square foot office space in Denver, Colorado. The lease is a 37 month lease that commenced on January 1, 2019.

Jet Yard leases approximately 48.5 acres of land from Pinal County at the Pinal Air Park in Marana, Arizona. The lease expires in May 2046, though Jet Yard has an option to renew the lease for an additional 30-year period (though the lease to a 2.6-acre parcel of the leased premises may be terminated by Pinal County upon 90 days' notice). The lease agreement permits Pinal County to terminate the lease if Jet Yard fails to make substantial progress toward the construction of facilities on the leased premises in phases in accordance with a specified timetable. On May 27, 2020, Pinal County and Jet Yard entered into the first amendment to the lease agreement in which Pinal County agreed to the terms of Jet Yard's ground hardening civil improvement project ("ground hardening improvements") on areas under lease to improve its aircraft parking facilities. As of March 31, 2021, Jet Yard has subleased the aforementioned lease along with the ground hardening improvements to Jet Yard Solutions.

DSI leases 12,206 square feet of space in a building located in Mississauga, Canada. The lease expires on July 31, 2023. The lease required Air T to deposit six months' rent as a cash deposit.

AirCo and Worthington began work in mid-2019 to consolidate back office operations. This process began with the move of AirCo's inventory from Wichita to Eagan MN. In parallel to this, Worthington worked with the landlord and property manager on a tenant expansion project to add an additional 2,546 square feet of office space and 11,214 square feet of warehouse to the Eagan MN facility to consolidate inventory and support operations into one facility. AirCo Services occupied the Wichita facility through the end of the lease on April 30, 2020 at which time the Repair Station moved to Eagan, MN.

Worthington and AirCo lease a 41,280 square-foot facility in Eagan, Minnesota. The lease for this facility expires in December 2027. In addition, Worthington also leases a 12,000 square-foot storage facility in Hastings, Minnesota. The lease for this facility expires in July 2022. Worthington has two leases in Tulsa, Oklahoma. One lease is 22,582 square feet and expires in January 2022. The other lease is 10,000 square feet and expires in September 2020. Additionally, Worthington also has two facility leases in Australia: Unit E3 is 1,195 square feet and Unit B5 is 1,442 square feet, both of which expire in January 2025.

Item 3. Legal Proceedings.

The Company and its subsidiaries are subject to legal proceedings and claims that arise in the ordinary course of their business. We believe that our current proceedings will not have a material adverse effect on our financial condition, liquidity or results of operations. We record a liability when a loss is considered probable, and the amount can be reasonably estimated.

Item 4. Mine Safety Disclosures.

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

The Company's common stock is publicly traded on the NASDAQ Global Market under the symbol "AIRT."

As of March 31, 2021, the approximate number of holders of record of the Company's Common Stock was 160.

The Company has not paid any cash dividends since 2014.

On May 14, 2014, the Company announced that its Board of Directors had authorized a program to repurchase up to 750,000 shares (adjusted to 1,125,000 shares after the stock split on June 10, 2019) of the Company's common stock from time to time on the open market or in privately negotiated transactions, in compliance with SEC Rule 10b-18, over an indefinite period. The Company did not repurchase any shares pursuant to this authorization during the fiscal year ended March 31, 2021.

The equity compensation plan information called for by Item 201(d) of Regulation S-K is set forth in Item 12 "Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters" of Part III of this report under the heading "Equity Compensation Plan Information".

As of March 31, 2021, the Company did not sell any securities within the past three years that were not registered under the Securities Act.

Item 6. [Reserved]

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Overview

Air T, Inc. (the "Company," "Air T," "we" or "us" or "our") is a holding company with a portfolio of operating businesses and financial assets. Our goal is to prudently and strategically diversify Air T's earnings power and compound the growth in its free cash flow per share over time.

We currently operate in four industry segments:

- Overnight air cargo, which operates in the air express delivery services industry;
- Ground equipment sales, which manufactures and provides mobile deicers and other specialized equipment
 products to passenger and cargo airlines, airports, the military and industrial customers;
- Commercial aircraft, engines and parts, which manages and leases aviation assets; supplies surplus and
 aftermarket commercial jet engine components; provides commercial aircraft disassembly/part-out services;
 commercial aircraft parts sales; procurement services and overhaul and repair services to airlines and;
- Corporate and other, which acts as the capital allocator and resource for other consolidated businesses. Further, Corporate and other is also comprised of insignificant businesses that do not pertain to other reportable segments.

On September 30, 2019, we completed the sale of 100% of the equity ownership in GAS, which previously constituted the ground support services segment. See Note 2, Discontinued Operations of Notes to Consolidated Financial Statements included under Part II, Item 8 of this report.

Each business segment has separate management teams and infrastructures that offer different products and services. We evaluate the performance of our business segments based on operating income and Adjusted EBITDA.

Forward Looking Statements

Certain statements in this Report, including those contained in "Overview," are "forward-looking" statements within the meaning of the Private Securities Litigation Reform Act of 1995 with respect to the Company's financial condition, results of operations, plans, objectives, future performance and business. Forward-looking statements include those preceded by, followed by or that include the words "believes", "pending", "future", "expects," "anticipates," "estimates," "depends" or similar expressions. These forward-looking statements involve risks and uncertainties. Actual results may differ materially from those contemplated by such forward-looking statements, because of, among other things, potential risks and uncertainties, such as:

- Economic conditions in the Company's markets;
- The risk that contracts with FedEx could be terminated or adversely modified;
- The risk that the number of aircraft operated for FedEx will be reduced;
- The risk that GGS customers will defer or reduce significant orders for deicing equipment;
- The impact of any terrorist activities on United States soil or abroad;
- The Company's ability to manage its cost structure for operating expenses, or unanticipated capital requirements, and match them to shifting customer service requirements and production volume levels;
- The Company's ability to meet debt service covenants and to refinance existing debt obligations;
- The risk of injury or other damage arising from accidents involving the Company's overnight air cargo operations, equipment or parts sold and/or services provided;
- Market acceptance of the Company's commercial and military equipment and services;
- Competition from other providers of similar equipment and services;
- Changes in government regulation and technology;
- Changes in the value of marketable securities held as investments;
- Mild winter weather conditions reducing the demand for deicing equipment;
- Market acceptance and operational success of the Company's new aircraft asset management business and related new aircraft capital joint venture; and
- The length and severity of the COVID-19 pandemic.

A forward-looking statement is neither a prediction nor a guarantee of future events or circumstances, and those future events or circumstances may not occur. We are under no obligation, and we expressly disclaim any obligation, to update or alter any forward-looking statements, whether as a result of new information, future events or otherwise.

Results of Operations

Due to insignificance, the Company combined the previous printing and equipment segment into corporate and other. We have presented prior periods based on the current presentation.

<u>Outlook</u>

COVID-19 and its impact on the current financial, economic and capital markets environment, and future developments in these and other areas present uncertainty and risk with respect to our financial condition and results of operations. Each of our businesses implemented measures to attempt to limit the impact of COVID-19 but we still experienced a substantial number of disruptions, and we experienced and continue to experience a reduction in demand for commercial aircraft, jet engines and parts compared to historical periods. Many of our businesses may continue to generate reduced operating cash flow and may operate at a loss during at least the first half of fiscal 2022. We expect that the impact of COVID-19 will continue to some extent. The fluidity of this situation precludes any prediction as to the ultimate adverse impact of COVID-19 on economic and market conditions and our business in particular, and, as a result, present material uncertainty and risk with respect to us and our results of operations.

Fiscal 2021 vs. 2020

Consolidated revenue decreased by \$61.7 million (26%) to \$175.1 million for the fiscal year ended March 31, 2021 compared to the prior fiscal year. Following is a table detailing revenue (after elimination of intercompany transactions), in thousands:

	 Year ended March 31,			Change	
	2021		2020		
Overnight Air Cargo	\$ 66,251	\$	75,275	\$ (9,024)	(12)%
Ground Equipment Sales	60,679		59,156	1,523	3 %
Commercial Jet Engines and Parts	46,793		101,284	(54,491)	(54)%
Corporate and Other	1,398		1,070	328	31 %
Total	\$ 175,121	\$	236,785	\$ (61,664)	(26)%

Revenues from the air cargo segment decreased by \$9.0 million (12%) compared to the prior fiscal year, principally attributable to lower sales to maintenance customers outside of FedEx as a result of COVID-19 and lower admin fees from FedEx due to fewer operating aircraft (66 aircraft in fiscal 2021 compared to 69 aircraft in fiscal 2020). Pass-through costs under the drylease agreements with FedEx totaled \$19.9 million and \$23.7 million for the years ended March 31, 2021 and 2020, respectively.

The ground equipment sales segment contributed approximately \$60.7 million and \$59.2 million to the Company's revenues for the fiscal periods ended March 31, 2021 and 2020, respectively, representing a \$1.5 million (3%) increase in the current year. The increase was primarily driven by a higher volume of truck sales to the USAF. At March 31, 2021, the ground equipment sales segment's order backlog was \$10.3 million compared to \$51.5 million at March 31, 2020.

The commercial jet engines and parts segment contributed \$46.8 million of revenues in fiscal year ended March 31, 2021 compared to \$101.3 million in the prior fiscal year which is a decrease of \$54.5 million (54%). The decrease is primarily attributable to the fact that all the companies within this segment had lower engine and component sales and lease income due to the impact of COVID-19 on the aviation industry as a whole.

Following is a table detailing operating (loss) income by segment, net of intercompany during Fiscal 2021 and Fiscal 2020 (in thousands):

		Year ended March 31,				Change		
	2021			2020				
Overnight Air Cargo	\$	2,178	\$	749	\$	1,429		
Ground Equipment Sales		8,948		7,302		1,646		
Commercial Jet Engines and Parts		(10,882)		8,322		(19,204)		
Corporate and Other		(9,419)		(9,082)		(337)		
Total	\$	(9,175)	\$	7,291	\$	(16,466)		

Consolidated operating loss for the fiscal year ended March 31, 2021 was \$9.2 million compared to consolidated operating income of \$7.3 million in the prior fiscal year.

Operating income for the air cargo segment increased by \$1.4 million in the current fiscal year, due primarily to having lower pilot and staff salaries as well as contract labor.

The ground equipment sales segment operating income increased by \$1.6 million from \$7.3 million in the prior year to \$8.9 million in the current year. This increase was primarily attributable to the increased sales noted in the segment revenue discussion above as well as better operating margin as a result of having a more profitable mix of products sold.

Operating loss of the commercial jet engines and parts segment was \$10.9 million compared to operating income of \$8.3 million in the prior year. The change was primarily attributable to the decreased aircraft engines and component sales as well as reduced lease income due to COVID-19 at the companies within this segment as explained in the segment revenue discussion above. This segment's current year operating loss was also further increased due to inventory write-down of \$6.4 million.

Following is a table detailing consolidated non-operating expenses, net of intercompany during Fiscal 2021 and Fiscal 2020 (in thousands):

Year Ended March 31,					Change		
	2021	2020					
\$	_	\$	(2,305)	\$	2,305		
	(4,624)		(4,692)		68		
	_		4,527		(4,527)		
	(723)		(910)		187		
	2,741		(1,287)		4,028		
\$	(2,606)	\$	(4,667)	\$	2,061		
	\$	2021 \$ — (4,624) — (723) 2,741	2021 \$ \$ (4,624) (723) 2,741	2021 2020 \$ — \$ (2,305) (4,624) (4,692) — 4,527 (723) (910) 2,741 (1,287)	2021 2020 \$ — \$ (2,305) \$ (4,624) (4,692) — 4,527 (723) (910) 2,741 (1,287)		

The Company had net non-operating expenses of \$2.6 million for the year ended March 31, 2021, a decrease of \$2.1 million from \$4.7 million in the prior year. The decrease was primarily due to the prior-year's impairment loss on the investment of Insignia of \$2.3 million that did not recur in the current-year as well as an increase of \$4.0 million in other income, driven by \$2.1 million of investment income and realized gain on sale of securities in the current-year. The decrease was partially offset by the prior-year's gain on settlement of bankruptcy proceedings related to Dephax Canada and UK of \$4.5 million that did not recur in the current-year.

During the year ended March 31, 2021, the Company recorded \$3.4 million of income tax benefit related to continuing operations, which yielded an effective rate of 28.8%. The primary factors contributing to the difference between the federal statutory rate of 21% and the Company's effective tax rate for the fiscal year ended March 31, 2021 were the estimated benefit for the exclusion of income for the Company's captive insurance company subsidiary under §831(b), the exclusion of the minority owned portion of pretax income of Contrail Aviation Support, LLC, state income tax expense, the rate differential for the NOL carryback claim and changes in the valuation allowance. The change in the valuation allowance is primarily due to unrealized losses on investments and the generation of foreign tax credits through the NOL carryback claim that the Company expects to expire before they are fully utilized.

the NOL carryback claim and changes in the valuation allowance. The change in the valuation allowance is primarily due to unrealized losses on investments and the generation of foreign tax credits through the NOL carryback claim that the Company expects to expire before they are fully utilized.

During the fiscal year ended March 31, 2020, the Company recorded \$0.5 million of income tax benefit related to continuing operations at an effective tax rate of -20.7%. The primary factors contributing to the difference between the federal statutory rate of 21% and the Company's effective tax rate for the fiscal year ended March 31, 2020 were the estimated benefit for the exclusion of income for the Company's captive insurance company subsidiary under §831(b), the exclusion of the minority owned portion of pretax income of Contrail Aviation Support, LLC as well as state income tax expense, and changes in the

valuation allowance. The change in the valuation allowance is primarily due to unrealized losses on investments, utilization of capital loss carryforwards, and attribute reduction incurred by Delphax related to cancellation of debt income and dissolution of

its Canadian and UK subsidiaries.

Market Outlook

COVID-19 and its impact on the financial, economic and capital markets environment, and future developments in these and other areas present uncertainty and risk with respect to our financial condition and results of operations. Each of our businesses implemented measures to attempt to limit the impact of COVID-19 but we still experienced a substantial number of disruptions, and a reduction in demand for commercial aircraft, jet engines and parts compared to historical periods. We currently expect that many of our businesses may continue to generate reduced operating cash flow and may operate at a loss during at least the first half of fiscal 2022. We expect that these impacts will continue to some extent. The fluidity of this situation precludes any prediction as to the ultimate adverse impact of COVID-19 on economic and market conditions, and, as a result, present material uncertainty and risk with respect to us and our results of operations.

The outbreak of the COVID-19 virus in the United States and elsewhere created considerable instability and disruption in the U.S. and world economies. Uncertainty still surrounds COVID-19 and its potential effects, as well as the extent and effectiveness of any responses taken on a national and local level. Measures taken to limit the impact of COVID-19, including shelter-in-place orders, social distancing measures and other restrictions on travel, congregation and business operations resulted in significant negative impacts in the United States and world economies and in relation to our business. The long-term impact of COVID-19 on the U.S. and world economies remains uncertain and the duration and scope of the world-wide economic downturn cannot currently be predicted. The extent to which our financial condition, results of operations and overall value will continue to be affected by the COVID-19 pandemic will largely depend on future developments, which are highly uncertain and cannot be accurately predicted, including the scope, severity and duration of the pandemic, the actions taken to contain the pandemic or mitigate its impact, and the direct and indirect economic effects of the pandemic, containment and the effectiveness of vaccine measures, among others.

As of March 31, 2021, the Company held approximately \$15.9 million in cash and cash equivalents and restricted cash, \$4.7 million of which related to restricted cash collateralized for three Opportunity Zone fund investments. The Company also held \$1.5 million in restricted investments held as statutory reserve of SAIC. The Company also has approximately \$1.4 million of marketable securities.

As of March 31, 2021, the Company's working capital amounted to \$77.6 million, an increase of \$46.9 million compared to March 31, 2020, primarily driven by a decrease in short-term borrowings of \$37.0 million. See Note 13 of Notes to Consolidated Financial Statements included under Part II, Item 8 of this report for a summary of "Financing Arrangements" as of March 31, 2021.

The Company's Credit Agreement with Minnesota Bank & Trust, a Minnesota state banking corporation ("MBT") (the Air T debt in Note 13 of Notes to Consolidated Financial Statements included under Part II, Item 8 of this report) includes several covenants that are measured once a year at March 31, including but not limited to, a negative covenant requiring a debt service coverage ratio of 1.25. The AirCo 1 Credit Agreement (the AirCo 1 debt in Note 13 of Notes to Consolidated Financial Statements included under Part II, Item 8 of this report) contains an affirmative covenant relating to collateral valuation. As of March 31, 2021, the Company and AirCo 1 were in compliance with all financial covenants.

The Contrail Credit Agreement (the Contrail debt in Note 13 of Notes to Consolidated Financial Statements included under Part II, Item 8 of this report) contains affirmative and negative covenants, including covenants that restrict the ability of Contrail and its subsidiaries to, among other things, incur or guarantee indebtedness, incur liens, dispose of assets, engage in mergers and consolidations, make acquisitions or other investments, make changes in the nature of its business, and engage in transactions with affiliates. The Contrail Credit Agreement also contains quarterly financial covenants applicable to Contrail and its subsidiaries, including a minimum debt service coverage ratio of 1.25 to 1.0 and a minimum tangible net worth ("TNW") of \$15 million.

On September 25, 2020, Contrail entered into a Third Amendment to Supplement #2 to Master Loan Agreement dated June 24, 2019 with Old National Bank ("ONB"). The material changes within the Third Amendment were: (a) to extend the date for compliance with the provision where Contrail is required to pay down the total outstanding principal balance of its revolver to zero for at least thirty consecutive days to September 5, 2021; and (b) to extend the date for compliance with the required quarterly debt service coverage ratio covenant such that Contrail shall commence compliance with the covenant commencing on March 31, 2022 and on the last day of each fiscal quarter thereafter.

Due primarily to the impact of COVID-19 on its business, as of March 31, 2021, Contrail was not in compliance with maintaining the minimum TNW of \$15 million. As of the issuance date of this report, pursuant to the existing terms of the Contrail Credit Agreement, the Company and the non-controlling interest owner of Contrail made total capital contributions to Contrail in the amount of \$1.4 million, which had the effect of curing this financial covenant non-compliance. Contrail and ONB are also in discussions to reduce the minimum TNW to \$8 million, in exchange for certain amendments to its credit agreement, including renewing its revolving line of credit at a lower amount than the current agreement. However, there is no assurance that Contrail will be successful in reducing the minimum TNW financial covenant.

The obligations of Contrail under the Contrail Credit Agreement are guaranteed by the Company, up to a maximum of \$1.6 million, plus costs of collection. The Company is not liable for any other assets or liabilities of Contrail and there are no cross-default provisions with respect to Contrail's debt in any of the Company's debt agreements with other lenders. In the possible absence of Contrail's operation as a going concern, the Company believes it, along with the rest of its businesses, will continue to operate as a going concern, given the maximum guarantee of Contrail's obligations of \$1.6 million.

On November 24, 2020, Contrail and ONB entered into Supplement #8 to Master Loan Agreement and related documentation for a loan in the aggregate amount of \$43.6 million for which ONB served as lender pursuant to the Main Street Priority Loan Facility as established by the U.S. Federal Reserve ("the Fed"). The Contrail Main Street Loan was approved by the Fed and completed by December 8, 2020. The proceeds were used to pay down the Contrail Revolver. The loan proceeds are also to be used as working capital to support the operations of Contrail in the ordinary course of business, which includes the acquisition from time to time of aircraft and engines. The indebtedness incurred is subject to the terms and provisions of the Master Loan Agreement. The principal terms of the Contrail Main Street Loan are detailed in Note 13 of Notes to Consolidated Financial Statements included under Part II, Item 8 of this report.

On December 11, 2020, AirCo 1 and Park State Bank ("PSB") entered into a loan in the aggregate amount of \$6.2 million for which PSB served as lender pursuant to the Main Street Priority Loan Facility as established by the Fed. The AirCo 1 Main Street Loan was approved by the Fed and completed by December 22, 2020. The loan proceeds were used to pay off the AirCo 1 revolving line of credit with MBT. The principal terms of the Term Loan - PSB are detailed in Note 13 of Notes to Consolidated Financial Statements included under Part II, Item 8 of this report.

The revolving line of credit at Air T with MBT has a due date or expires within the next twelve months. We are currently seeking to refinance this obligation prior to August 31, 2021; however, there is no assurance that we will be able to execute this refinancing or, if we are able to refinance this obligation, that the terms of such refinancing would be as favorable as the terms of our existing credit facility.

In April 2020, the Company obtained loans under the Payroll Protection Program ("PPP loan"), as authorized by the CARES Act, of \$8.2 million to help pay for payroll costs, mortgage interest, rent and utility costs. The Company has applied to MBT for forgiveness of the PPP Loan; however, forgiveness is not fully assured.

As mentioned in Note 1 of Notes to Consolidated Financial Statements included under Part II, Item 8 of this report, in 2016, Contrail Aviation entered into an Operating Agreement with the Seller providing for the put and call options with regard to the 21% non-controlling interest retained by the Seller. The Seller is the founder of Contrail Aviation and its current Chief Executive Officer. The Put/Call Option permits the Seller to require Contrail Aviation to purchase all of the Seller's equity membership interests in Contrail Aviation commencing on the fifth anniversary of the acquisition, which is on July 18, 2021. As of the date of issuance, neither the Seller nor Air T has indicated the intent to exercise its put and call options on July 18, 2021. If either side were to exercise its option, the Company anticipates that the price would approximate the fair value of the Redeemable Non-Controlling Interest, as determined on the transaction date, based on the methodology in Note 1 of Notes to Consolidated Financial Statements included under Part II, Item 8 of this report. The Company currently expects that it would fund any required payment from cash provided by operations.

The Company believes it is probable that the cash on hand (including that obtained from the PPP and other current financings), net cash provided by operations from its remaining operating segments, together with its current revolving lines of credit, as amended or replaced, will be sufficient to meet its obligations as they become due in the ordinary course of business for at least 12 months following the date these financial statements are issued.

Cash Flows

Following is a table of changes in cash flow from continuing operations for the respective years ended March 31, 2021 and 2020 (in thousands):

	Year Ended March 31,					
	2021 2020				Change	
Net Cash Used in Operating Activities	\$	(1,823)	\$	(26,231)	\$	24,408
Net Cash Provided by (Used in) Investing Activities		2,516		(11,568)		14,084
Net Cash Provided by Financing Activities		71		19,240		(19,169)
Effect of foreign currency exchange rates		(412)		260		(672)
Net Increase (Decrease) in Cash and Cash Equivalents and Restricted Cash	\$	352	\$	(18,299)	\$	18,651

Cash used in operating activities was \$1.8 million in fiscal year 2021 compared to cash used in operating activities of \$26.2 million in fiscal year 2020. During fiscal year 2020, the Company's purchase of engines and components received into inventory exceeded amounts spent in fiscal year 2021 by \$23.7 million. Further, more cash was collected this year compared to the prior year as accounts receivable decreased by \$6.6 million. The decrease in cash usage was offset by a decrease in net income of \$11.6 million due to reduced operations as a result of COVID-19.

Cash provided by investing activities for fiscal year 2021 was \$2.5 million compared to cash used in investing activities for the prior fiscal year of \$11.6 million. This difference was primarily driven by a net decrease of \$32.7 million in capital expenditures, partially offset by \$22.5 million less proceeds from sale of assets on lease in fiscal year 2021 compared to fiscal year 2020.

Cash provided by financing activities for fiscal year 2021 was \$19.2 million less compared to the prior fiscal year. This was primarily due to decreased net proceeds from lines of credit of \$65.9 million, offset by increased net proceeds from term loans of \$51.7 million.

Off-Balance Sheet Arrangements

The Company defines an off-balance sheet arrangement as any transaction, agreement or other contractual arrangement involving an unconsolidated entity under which a Company has (1) made guarantees, (2) a retained or a contingent interest in transferred assets, (3) an obligation under derivative instruments classified as equity, or (4) any obligation arising out of a material variable interest in an unconsolidated entity that provides financing, liquidity, market risk or credit risk support to the Company, or that engages in leasing, hedging, or research and development arrangements with the Company. The Company is not currently engaged in the use of any of these arrangements.

Impact of Inflation

The Company believes that inflation has not had a material effect on its manufacturing and commercial jet engine and parts operations, because increased costs to date have been passed on to customers. Under the terms of its overnight air cargo business contracts the major cost components of that segment's operations, consisting principally of fuel, crew and other direct operating costs, and certain maintenance costs are reimbursed by its customer. Significant increases in inflation rates could, however, have a material impact on future revenue and operating income.

Non-GAAP Financial Measures

The Company uses adjusted earnings before taxes, interest, and depreciation and amortization ("Adjusted EBITDA"), a non-GAAP financial measure as defined by the SEC, to evaluate the Company's financial performance. This performance measure is not defined by accounting principles generally accepted in the United States and should be considered in addition to, and not in lieu of, GAAP financial measures.

Adjusted EBITDA is defined as earnings before taxes, interest, and depreciation and amortization, adjusted for specified items. The Company calculates Adjusted EBITDA by removing the impact of specific items and adding back the amounts of interest expense and depreciation and amortization to earnings before income taxes. When calculating Adjusted EBITDA, the Company does not add back depreciation expense for aircraft engines that are on lease, as the Company believes this expense matches with the corresponding revenue earned on engine leases. Depreciation expense for leased engines totaled \$1.9 million and \$4.4 million for the fiscal year ended March 31, 2021 and 2020.

Management believes that Adjusted EBITDA is a useful measure of the Company's performance because it provides investors additional information about the Company's operations allowing better evaluation of underlying business performance and better period-to-period comparability. Adjusted EBITDA is not intended to replace or be an alternative to operating income from continuing operations, the most directly comparable amounts reported under GAAP.

The table below provides a reconciliation of operating income from continuing operations to Adjusted EBITDA for the fiscal year ended March 31, 2021 and 2020 (in thousands):

	Twelve Months Ended					
	March 31, 2021 March 3					
Operating (loss) income from continuing operations	\$ (9,175)	\$	7,291			
Depreciation and amortization (excluding leased engines depreciation)	1,231		1,329			
Asset impairment, restructuring or impairment charges	6,592		18			
Gain on sale of property and equipment	(10)		(37)			
Security issuance expenses	 32		363			
Adjusted EBITDA	\$ (1,330)	\$	8,964			

Included in the asset impairment, restructuring or impairment charges for the fiscal year ended March 31, 2021 was a write-down of \$6.4 million on the commercial jet engines and parts segment's inventory. Of the total write-down, \$0.5 million was driven by a management decision to monetize two engines by sale to a third party, in which the net carrying values exceeded the estimated proceeds during the quarter ended September 30, 2020. The remaining write-down was attributable to our evaluation of the carrying value of inventory as of March 31, 2021, where we compared its cost to its net realizable value and considered factors such as physical condition, sales patterns and expected future demand to estimate the amount necessary to write down any slow moving, obsolete or damaged inventory.

The table below provides Adjusted EBITDA by segment for the fiscal year ended March 31, 2021 and 2020 (in thousands):

	 Twelve Months Ended					
	March 31, 2021 March 31,					
Overnight Air Cargo	\$ 2,248	\$	821			
Ground Equipment Sales	9,132		7,588			
Commercial Jet Engines and Parts	(3,933)		8,718			
Corporate and Other	(8,777)		(8,163)			
Adjusted EBITDA	\$ (1,330)	\$	8,964			

Seasonality

The ground equipment sales segment business has historically been seasonal, with the revenues and operating income typically being higher in the second and third fiscal quarters as commercial deicers are typically delivered prior to the winter season. Other segments are typically not susceptible to material seasonal trends.

Critical Accounting Policies and Estimates.

The Company's significant accounting policies are described in Note 1 of Notes to Consolidated Financial Statements included under Part II, Item 8 of this report. The preparation of the Company's consolidated financial statements in conformity with accounting principles generally accepted in the United States requires the use of estimates and assumptions to determine certain assets, liabilities, revenues and expenses. Management bases these estimates and assumptions upon the best information available at the time of the estimates or assumptions. The Company's estimates and assumptions could change materially as conditions within and beyond our control change. Accordingly, actual results could differ materially from estimates. The Company believes that the following are its most critical accounting policies:

<u>Inventories</u> – Inventories are carried at the lower of cost or net realizable value. Within the Company's commercial jet engines and parts segment, there are various estimates and judgments made in relief of inventory as parts are sold from established groups of parts from one engine or airframe purchase. The estimates and judgments made in relief of inventory are based on assumptions that are consistent with a market participant's future expectations for the commercial aircraft, jet engines and parts industry and the economy in general and our expected intent for the inventory. These assumptions and estimates are complex and subjective in nature. Changes in economic and operating conditions, including those occurring as a result of the impact of the COVID-19 pandemic could impact the assumptions and result in future losses to our inventory.

The Company periodically evaluates the carrying value of inventory. In these evaluations, the Company is required to make estimates regarding the net realizable value, which includes the consideration of sales patterns and expected future demand. Any slow moving, obsolete or damaged inventory and inventory with costs exceeding net realizable value are evaluated for write-downs. These estimates could vary significantly from actual amounts based upon future economic conditions, customer inventory levels, or competitive factors that were not foreseen or did not exist when the estimated write-downs were made.

<u>Valuation of Assets on Lease or Held for Lease</u> - Engine assets on lease or held for lease are stated at cost, less accumulated depreciation. On a quarterly basis, we monitor the portfolio for events which may indicate that a particular asset may need to be evaluated for potential impairment. These events may include a decision to part-out or sell an asset, knowledge of specific damage to an asset, or supply/demand events which may impact the Company's ability to lease an asset in the future. On an annual basis, even absent any such 'triggering event', we evaluate the assets in our portfolio to determine if their carrying amount may not be recoverable. If an asset is determined to be unrecoverable, the asset is written down to fair value. When evaluating for impairment, we test at the individual asset level (e.g., engine, airframe or aircraft), as each asset generates its own stream of cash flows, including lease rents and maintenance reserves.

The Company must make significant and subjective estimates in determining whether any impairment exists. Those estimates are as follows:

- Fair value we determine fair value by reference to independent appraisals, quoted market prices (e.g., an offer to purchase) and other factors such as current data from airlines, engine manufacturers and MRO providers as well as specific market sales and repair cost data.
- Future cash flows when evaluating the future cash flows that an asset will generate, we make assumptions regarding the lease market for specific engine models, including estimates of market lease rates and future demand. These assumptions are based upon lease rates that we are obtaining in the current market as well as our expectation of future demand for the specific engine/aircraft model.

If the forecasted undiscounted cash flows and fair value of our long-lived assets decrease in the future, we may incur impairment charges.

Accounting for Redeemable Non-Controlling Interest. Policies related to redeemable non-controlling interest involve judgment and complexity, specifically on the classification of the non-controlling interest in the Company's consolidated balance sheet. Further, there is significant judgment in determining whether an equity instrument is currently redeemable or not currently redeemable but probable that the equity instrument will become redeemable. Additionally, there are also significant estimates made in the valuation of the redeemable non-controlling interest. The fair value of the non-controlling interest is determined using a combination of the income approach, utilizing a discounted cash flow analysis, and the market approach, utilizing the guideline public company method. Contrail's discounted cash flow analysis requires significant management judgment with respect to forecasts of revenue, operating margins, capital expenditures, and the selection and use of an appropriate discount rate. Contrail's market approach requires management to make significant assumptions related to market multiples of earnings derived from comparable publicly-traded companies with similar operating characteristics as Contrail.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk.

Not Applicable.

Item 8. Financial Statements and Supplementary Data.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the shareholders and the Board of Directors of Air T, Inc.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Air T, Inc. and subsidiaries (the "Company") as of March 31, 2021 and 2020, the related consolidated statements of income, comprehensive income, equity, and cash flows, for each of the two years in the period ended March 31, 2021, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of March 31, 2021 and 2020, and the results of its operations and its cash flows for each of the two years in the period ended March 31, 2021, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current-period audit of the financial statements that were communicated or required to be communicated to the audit committee and that (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Redeemable non-controlling interest – valuation of Contrail Aviation Support, LLC — Refer to Notes 1 and 5 to the financial statements

Critical Audit Matter Description

The Company has a 79% controlling interest in Contrail Aviation Support, LLC and is party to an operating agreement with the owner of the remaining 21% ownership interest in Contrail Aviation Support, LLC, that contains certain future redemption features that are outside the control of the Company.

This arrangement is recorded and disclosed as a redeemable non-controlling interest at fair value of \$6.6 million as of March 31, 2021. The Company adjusts the redeemable non-controlling interest each reporting period to the higher of the redemption value or carrying value, using a combination of the income approach, utilizing a discounted cash flow analysis, and the market approach, utilizing the guideline public company method. The determination of fair value includes estimation uncertainty under both approaches.

The income approach requires significant management judgment with respect to forecasts of future revenue, operating margins, and capital expenditures, and the selection and use of an appropriate discount rate. The market approach requires management to make significant assumptions related to market multiples of earnings derived from comparable publicly-traded companies with similar operating characteristics as Contrail Aviation Support, LLC. We identified the valuation of redeemable non-controlling interest in Contrail Aviation Support, LLC as a critical audit matter given the significant judgments and assumptions required by management to estimate the fair value of the redeemable non-controlling interest, as well as the fact that performing audit procedures required a high degree of auditor judgment and an increased extent of effort, including the need to involve our fair value specialists.

Our audit procedures related to the significant judgments and assumptions utilized in the valuation of the redeemable non-controlling interest in Contrail Aviation Support, LLC, included the following, among others:

- We evaluated the reasonableness of management's forecasts of future revenue and operating margins by comparing the forecasts to:
 - Historical results of Contrail Aviation Support, LLC, and
 - Forecasted information included in industry reports.
- We considered the impact of industry and market conditions on management's forecasts for Contrail Aviation Support, LLC.
- We involved our fair value specialists to assist in the evaluation of:
 - The valuation methodologies used by the Company to determine whether they were consistent with generally accepted valuation practices, and reasonably weighted.
 - The discount rates, including testing the underlying source information and the mathematical accuracy of the calculations, and developing a range of independent estimates and comparing those to the discount rates selected by management.
 - Earnings multiples, including testing the underlying source information and mathematical accuracy of the calculations, and evaluating the appropriateness of the Company's selection of companies in its industry comparable groups.
- We performed sensitivity analyses with regard to forecasted revenue and the discount rate to evaluate the changes in the fair value of the redeemable non-controlling interest in Contrail Aviation Support, LLC, that would result from changes in those significant assumptions.
- We evaluated whether the business and valuation assumptions used were consistent with evidence obtained in other areas of the audit.

Inventories, net - valuation of inventories- Refer to Notes 1 and 6 to the financial statements

Critical Audit Matter Description

Inventories are carried at the lower of cost or net realizable value. In its periodic evaluation of the carrying value of these inventories, the Company is required to make estimates regarding the net realizable value, which includes the consideration of sales patterns and expected future demand. Changes in these assumptions could have a significant impact on the valuation of certain inventory held by the Company's Commercial Jet Engines and Parts operating segment.

We identified the valuation of certain inventory held by the Company's Commercial Jet Engines and Parts operating segment as a critical audit matter. Given the magnitude of the inventories at certain business units, coupled with the significant judgments necessary to project sales patterns and expected future demand, as well as changes in economic and market conditions brought on by COVID-19, auditing such estimates required a high degree of auditor judgment and an increased extent of effort, including the need to involve our fair value specialists, when performing audit procedures and evaluating the results of those procedures.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related to the sales patterns and expected future demand, used by management to determine the valuation of inventories, included the following, among others:

- We evaluated the reasonableness of the sales patterns and expected future demand, and related inputs used by management, by comparing the information to:
 - Historical results of those business units.
 - Forecasted sales based on recent quote and sales information for similar parts within the Company's inventory.
 - Market data and forecasts with regard to the recovery of the airline industry from the impacts of COVID-19.
- We involved our fair value specialists to assist in the evaluation of:
 - The methodology used by, and the qualifications of, the Company's third-party specialist.
 - The key assumptions underlying the valuation of a representative sample of inventories including recent quotes, number of vendors, number of components, and component condition.
- We held discussions with various members of management to understand the status of any plans to monetize certain inventories at less than carrying value to meet cash flow demands and evaluated whether the determination of net realizable value for those inventories reflects the status of management's plans.

/s/ Deloitte & Touche LLP Minneapolis, Minnesota June 25, 2021

We have served as the Company's auditor since 2018.

AIR T, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS YEARS ENDED MARCH 31, 2021 AND 2020

Air T, Inc. (the "Company," "Air T," "we" or "us" or "our") is a holding company with a portfolio of operating businesses and financial assets. Our goal is to prudently and strategically diversify Air T's earnings power and compound the growth of free cash flow per share over time.

We currently operate in four industry segments:

- Overnight air cargo, which operates in the air express delivery services industry;
- Ground equipment sales, which manufactures and provides mobile deicers and other specialized equipment products to passenger and cargo airlines, airports, the military and industrial customers;
- Commercial aircraft, engines and parts, which manages and leases aviation assets; supplies surplus and aftermarket commercial jet engine components; provides commercial aircraft disassembly/part-out services; commercial aircraft parts sales; procurement services and overhaul and repair services to airlines and;
- Corporate and other, which acts as the capital allocator and resource for other consolidated businesses. Further, Corporate and other is also comprised of insignificant businesses that do not pertain to other reportable segments.

Each business segment has separate management teams and infrastructures that offer different products and services. We evaluate the performance of our business segments based on operating income and Adjusted EBITDA.

Discontinued Operations

On September 30, 2019, the Company completed the sale of Global Aviation Services, LLC ("GAS"). The results of operations of GAS are reported as discontinued operations in the consolidated statements of operations for the fiscal years ended March 31, 2021 and 2020. Refer to Footnote 2 - "Discontinued Operations" for additional information.

Unless otherwise indicated, the disclosures accompanying the consolidated financial statements reflect the Company's continuing operations.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

<u>Principles of Consolidation</u> – The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries as well as its non-wholly owned subsidiaries, Contrail Aviation and Delphax. All intercompany transactions and balances have been eliminated in consolidation. Certain reclassifications have been made to the prior period amounts to conform to the current presentation.

Accounting Estimates – The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts of assets and liabilities and amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

COVID-19 and its impact on the current financial, economic and capital markets environment, and future developments in these and other areas present uncertainty and risk with respect to our financial condition and results of operations. Each of our businesses implemented measures to attempt to limit the impact of COVID-19 but we still experienced a number of disruptions, and we experienced and continue to experience a reduction in demand for commercial aircraft, jet engines and parts compared to historical periods. We currently expect that many of our businesses may continue to generate reduced operating cash flow and may operate at a loss during at least the first half of fiscal 2022 and potentially even longer. We expect that these impacts will continue to some extent if the outbreak persists. The fluidity of this situation precludes any prediction as to the ultimate adverse impact of COVID-19 on economic and market conditions, and, as a result, present material uncertainty and risk with respect to us and our results of operations. The Company believes the estimates and assumptions underlying the Company's consolidated financial statements are reasonable and supportable based on the information available as of March 31, 2021, however; uncertainty over the ultimate impact COVID-19 will have on the global economy generally, and the Company's business in particular, makes any estimates and assumptions as of March 31, 2021 inherently less certain than they would be absent the current and potential impacts of COVID-19.

<u>Segments</u> - The Company has four reportable operating segments: overnight air cargo, ground equipment sales, commercial jet engine and parts and corporate and other. The Company assesses the performance of these segments on an individual basis (see <u>Note 21</u>).

Operating segments are defined as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker, or decision making group, in deciding how to allocate resources and in assessing performance. The Company's chief operating decision maker is its Chief Executive Officer. The Company's Chief Executive Officer reviews financial information by business segment for purposes of allocating resources and evaluating financial performance. Each business segment has separate management teams and infrastructures that offer different products and services. We evaluate the performance of our business segments based on operating income.

<u>Variable Interest Entities</u> – In accordance with the applicable accounting guidance for the consolidation of variable interest entities, the Company analyzes its variable interests to determine if an entity in which we have a variable interest is a variable interest entity. Our analysis includes both quantitative and qualitative reviews to determine if we must consolidate a variable interest entity as its primary beneficiary.

Business Combinations – The Company accounts for business combinations in accordance with Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 805, *Business Combinations*. Consistent with ASC 805, the Company accounts for each business combination by applying the acquisition method. Under the acquisition method, the Company records the identifiable assets acquired and liabilities assumed at their respective fair values on the acquisition date. Goodwill is recognized for the excess of the purchase consideration over the fair value of identifiable net assets acquired. Included in purchase consideration is the estimated acquisition date fair value of any earn-out obligation incurred. For business combinations where non-controlling interests remain after the acquisition, assets (including goodwill) and liabilities of the acquired business are recorded at the full fair value and the portion of the acquisition date fair value attributable to non-controlling interests is recorded as a separate line item within the equity section or, as applicable to redeemable non-controlling interests, between the liabilities and equity sections of the Company's consolidated balance sheets.

The acquisition method permits the Company a period of time after the acquisition date during which the Company may adjust the provisional amounts recognized in a business combination. This period of time is referred to as the "measurement period". The measurement period provides an acquirer with a reasonable time to obtain the information necessary to identify and measure the assets acquired and liabilities assumed. If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Company reports in its consolidated financial statements provisional amounts for the items for which the accounting is incomplete. Accordingly, the Company is required to recognize adjustments to the provisional amounts, with a corresponding adjustment to goodwill, in the reporting period in which the adjustments to the provisional amounts are determined. Thus, the Company would adjust its consolidated financial statements as needed, including recognizing in its current-period earnings the full effect of changes in depreciation, amortization, or other income effects, by line item, if any, as a result of the change to the provisional amounts calculated as if the accounting had been completed at the acquisition date.

Income statement activity of an acquired business is reflected within the Company's consolidated statements of income commencing with the date of acquisition. Amounts for pre-acquisition periods are excluded.

Acquisition-related costs are costs the Company incurs to affect a business combination. Those costs may include such items as finder's fees, advisory, legal, accounting, valuation, and other professional or consulting fees, and general administrative costs. The Company accounts for such acquisition-related costs as expenses in the period in which the costs are incurred and the services are received.

Changes in estimate of the fair value of earn-out obligations subsequent to the acquisition date are not accounted for as part of the acquisition, rather, they are recognized directly in earnings.

<u>Cash and Cash Equivalents</u> – Cash equivalents consist of liquid investments with maturities of three months or less when purchased.

<u>Financial Instruments Designated for Trading</u> – Except for short sales of equity securities, the Company accounts for all other financial instruments (including derivative instruments) designated for trading in accordance with ASC 815. All changes in the fair value of the financial instruments designated for trading are recognized in earnings as they occur. Further, all gains and losses on derivative instruments designated for trading are presented net on the consolidated Statements of Income (Loss). The fair value of derivative instruments designated for trading in a gain position are recorded in Other Current Assets and the fair value of derivative instruments designated for trading in a loss position are recorded in Accrued Expenses and Other on the consolidated Balance Sheets.

The Company accounts for short sales of equity securities in accordance with ASC 942 and ASC 860. The obligations incurred in short sales are reported in Accrued Expenses and Other on the consolidated Balance Sheets. They are subsequently measured at fair value through the income statement at each reporting date with gains and losses on securities. Interest on the short positions are accrued periodically and reported as interest expense. The market value of the Company's equity securities and cash held by the broker are used as collateral against any outstanding margin account borrowings for purposes of short selling equities. This collateral is recorded in Other Current Assets on the consolidated Balance Sheets.

The Company reports all cash receipts and payments resulting from the purchases and sales of securities, loans, and other assets that are acquired specifically for resale as operating cash flows.

<u>Inventories</u> – Inventories are carried at the lower of cost or net realizable value. When finished goods units are leased to customers under operating leases, the units are transferred to Assets on Lease or Held For Lease. The classification of cash flows associated with the purchase and sale of finished goods is based on the activity that is likely to be the predominant source or use of cash flows for the items. Consistent with aviation industry practice, the Company includes expendable aircraft parts and supplies in current assets, although a certain portion of these inventories may not be used or sold within one year.

The Company periodically evaluates the carrying value of inventory. In these evaluations, the Company is required to make estimates regarding the net realizable value, which includes the consideration of sales patterns and expected future demand. Any slow moving, obsolete or damaged inventory and inventory with costs exceeding net realizable value are evaluated for

write-downs. These estimates could vary significantly from actual amounts based upon future economic conditions, customer inventory levels, or competitive factors that were not foreseen or did not exist when the estimated write-downs were made.

In accordance with industry practice, all inventories are classified as a current asset including portions with long production cycles, some of which may not be realized within one year.

Investments under the Equity Method – The Company utilizes the equity method to account for investments when the Company possesses the ability to exercise significant influence, but not control, over the operating and financial policies of the investee. The ability to exercise significant influence is presumed when an investor possesses more than 20% of the voting interests of the investee. This presumption may be overcome based on specific facts and circumstances that demonstrate that the ability to exercise significant influence is restricted. The Company applies the equity method to investments in common stock and to other investments when such other investments possess substantially identical subordinated interests to common stock. For investments that have a different fiscal year-end, if the difference is not more than three months, the Company elects a 3-month lag to record the change in the investment.

The Company assesses the carrying value of its investments whenever events or changes in circumstances indicate that the carrying amounts may not be recoverable. The recoverability is measured by comparing the carrying amount of the investment to the estimated future undiscounted cash flows of the investment, which take into account current, and expectations for future, market conditions and the Company's intent with respect to holding or disposing of the investment. Changes in economic and operating conditions, including those occurring as a result of the impact of the COVID-19 pandemic, that occur subsequent to a current impairment analysis and the Company's ultimate use of the investment could impact the assumptions and result in future impairment losses to the investments. If the Company's analysis indicates that the carrying value is not recoverable on an undiscounted cash flow basis, the Company will recognize an impairment loss for the amount by which the carrying value exceeds the fair value. The fair value is determined through quoted prices in active markets or various valuation techniques, including internally developed discounted cash flow models or comparable market transactions.

<u>Goodwill</u> - The Company evaluates goodwill on an annual basis or anytime events or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying value.

The Company is permitted to first assess qualitative factors to determine whether it is more likely than not (that is, a likelihood of more than 50 percent) that the fair value of a reporting unit is less than its carrying value, including goodwill. In qualitatively evaluating whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount, the Company assesses relevant events and circumstances such as macroeconomic conditions, industry and market developments, cost factors, and the overall financial performance of the reporting unit. If, after assessing these events and circumstances, it is determined that there may be an impairment, then a quantitative analysis is performed. In the first step of the quantitative method, recoverability of goodwill is evaluated by estimating the fair value of the reporting unit's goodwill using multiple techniques, including a discounted cash flow model income approach and a market approach. The estimated fair value is then compared to the carrying value of the reporting unit. The Company will recognize an impairment charge for the amount by which the carrying value of the reporting unit exceeds its fair value, if any.

Goodwill consisted of the following (in thousands):

	Year Ended March 31,						
		2021	2020				
Goodwill, at original cost	\$	4,603	\$	4,603			
Less accumulated impairment		(376)		(376)			
Goodwill, net of impairment	\$	4,227	\$	4,227			

As of March 31, 2021, the entire \$4.2 million goodwill balance is attributable to the acquisition of Contrail Aviation and included within the Commercial Jet Engines and Parts segment. We performed our annual impairment assessment for goodwill of the Contrail reporting unit at March 31, 2021. In the fiscal year 2021, COVID-19 greatly impacted the macroeconomic conditions and the outlook of the airline industry. Due to this, the Company performed a quantitative analysis using a combination of the income approach, utilizing a discounted cash flow analysis, and the market approach, utilizing the guideline public company method. Contrail's discounted cash flow analysis requires significant management judgment with respect to forecasts of revenue, operating margins, capital expenditures, and the selection and use of an appropriate discount rate. The forecasts and assumptions are based on our annual and long-term business plans. Contrail's market approach requires management to make significant assumptions related to market multiples of revenue and earnings derived from comparable publicly-traded companies with similar operating characteristics as Contrail.

Based on the results of our annual quantitative assessment conducted as of March 31, 2021, the fair value of our Contrail reporting unit exceeded its carrying value, and management concluded that no impairment charge was warranted.

Intangible Assets – Amortizable intangible assets consist of acquired patents, tradenames, customer relationships, and other finite-lived identifiable intangibles. Such intangibles are initially recorded at fair value and subsequently subject to amortization. Amortization is recorded using the straight-line method over the estimated useful lives of the assets. In accordance with the applicable accounting guidance, the Company evaluates the recoverability of amortizable intangible assets whenever events occur that indicate potential impairment. In doing so, the Company assesses whether the carrying amount of the asset is unrecoverable by estimating the sum of the future cash flows expected to result from the asset, undiscounted and without interest charges. If the carrying amount is more than the recoverable amount, an impairment charge must be recognized based on the estimated fair value of the asset.

The estimated amortizable lives of the intangible assets are as follows:

	Years
Software	3
Trade names	5
Certification	5
Non-compete	5
License	5
Patents	9
Customer relationship	10

<u>Property and Equipment and Assets on Lease or Held for Lease</u> – Property and equipment is stated initially at cost, or fair value if purchased as part of a business combination. Depreciation and amortization are provided on a straight-line basis over the asset's useful life. Equipment leased to customers is depreciated using the straight line method. Useful lives range from three years for computer equipment, seven years for flight equipment, ten years for deicers and other equipment leased to customers and thirty years for buildings.

Engine assets on lease or held for lease are stated at cost, less accumulated depreciation. Certain costs incurred in connection with the acquisition of engine assets are capitalized as part of the cost of such assets. If assets are not actively being leased (i.e. held for lease), then they are not being depreciated. Major overhauls which improve functionality or extend original useful life are capitalized and depreciated over the engine assets' useful life to a residual value. The Company depreciates the engines on a straight-line basis over the assets' useful life from the acquisition date to a residual value. The Company adjusts its estimates annually for these older generation assets, including updating estimates of an engine's or aircraft's remaining operating life. The Company believes this methodology accurately reflects the typical holding period for the assets and, that the residual value assumption, which is dependent on the Company's eventual plan for the engine assets (i.e. whole asset sale, part-out, etc.), reasonably approximates the selling price of the assets.

When engine assets are committed for sales, the assets are transferred to Inventory. The classification of cash flows associated with the purchase and sale of engine assets is based on the activity that is likely to be the predominant source or use of cash flows for the items.

The Company assesses long-lived assets for impairment when events and circumstances indicate the assets may be impaired and the undiscounted cash flows estimated to be generated by those assets are less than their carrying amount. When evaluating the future cash flows that an asset will generate, we make assumptions regarding the lease market for specific engine models, including estimates of market lease rates and future demand. These assumptions are based upon lease rates that we are obtaining in the current market as well as our expectation of future demand for the specific engine/aircraft model. We determine fair value of the assets by reference to independent appraisals, quoted market prices (e.g., an offer to purchase) and other factors such as current data from manufacturers as well as specific market sales. In the event it is determined that the carrying values of long-lived assets are in excess of the estimated undiscounted cash flows from those assets, the Company then will write-down the value of the assets by the excess of carrying value over fair value.

Accounting for Debt - Trust Preferred Securities and Warrant Liability — On June 10, 2019, the Company issued an aggregate of 1.6 million TruPs in the amount of \$4.0 million in a non-cash transaction. These TruPs are mandatorily redeemable preferred security obligations of the Company. In accordance with ASC 480, the Company presented mandatorily redeemable preferred securities that do not contain a conversion option as a liability on the balance sheet. In connection with the issuance of the TruPs, the Company also issued an aggregate of 8.4 million warrants (representing warrants to purchase \$21.0 million in stated value of TruPs). A warrant for mandatorily redeemable shares conditionally obligates the issuer to ultimately transfer assets—the obligation is conditioned only on the warrant's being exercised because the shares will be redeemed. Thus, warrants for mandatorily redeemable shares are liabilities under ASC 480. Accordingly, the Warrants are recorded within "Other non-current liabilities" on our consolidated balance sheets. As of March 31, 2021, the Warrants are recorded at fair value. Fair value measurement was based on quoted price for a similar asset or liability as observed on the NASDAQ Global Market. The liability is classified as Level 2 in the hierarchy. See Note 5.

Income Taxes – Income taxes have been provided using the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax laws and rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect of a change in tax rates on deferred tax assets and liabilities is recognized in income in the period that includes the enactment date.

A valuation allowance against net deferred tax assets is recorded when it is more likely than not that such assets will not be fully realized. Tax credits are accounted for as a reduction of income taxes in the year in which the credit originates. All deferred income taxes are classified as non-current in the consolidated balance sheets. The Company recognizes the benefit of a tax position taken on a tax return, if that position is more likely than not of being sustained on audit, based on the technical merits of the position. An uncertain income tax position is not recognized if it has a less than a 50% likelihood of being sustained.

Accounting for Redeemable Non-Controlling Interest – In 2016, in connection with the Company's acquisition of Contrail Aviation, Contrail Aviation entered into an Operating Agreement (the "Operating Agreement") with the Seller providing for the governance of and the terms of membership interests in Contrail Aviation. The Operating Agreement includes put and call options ("Put/Call Option") with regard to the 21% non-controlling interest retained by the Seller. The Seller is the founder of Contrail Aviation and its current Chief Executive Officer. The Put/Call Option permits the Seller to require Contrail Aviation to purchase all of the Seller's equity membership interests in Contrail Aviation commencing on the fifth anniversary of the acquisition, which is on July 18, 2021. Per the agreement, the price is to be agreed upon by the parties or, failing such agreement, to be determined pursuant to third-party appraisals in a process specified in the agreement. Applicable accounting guidance requires an equity instrument that is redeemable for cash or other assets to be classified outside of permanent equity if it is redeemable (a) at a fixed or determinable price on a fixed or determinable date, (b) at the option of the holder, or (c) upon the occurrence of an event that is not solely within the control of the issuer.

As a result of this feature, the Company recorded the non-controlling interest as redeemable and classified it in temporary equity within its Consolidated Balance Sheets initially at its acquisition-date fair value. The non-controlling interest is adjusted each reporting period for income (or loss) attributable to the non-controlling interest as well as any applicable distributions made. A measurement period adjustment, if any, is then made to adjust the non-controlling interest to the higher of the redemption value (fair value) or carrying value each reporting period. These fair value adjustments are recognized through retained earnings and are not reflected in the Company's Consolidated Statements of Income. When calculating earnings per share attributable to the Company, the Company adjusts net income attributable to the Company for the measurement period adjustment to the extent the redemption value exceeds the fair value of the non-controlling interest on a cumulative basis. The fair value of the non-controlling interest is determined using a combination of the income approach, utilizing a discounted cash flow analysis, and the market approach, utilizing the guideline public company method. Contrail's discounted cash flow analysis requires significant management judgment with respect to forecasts of revenue, operating margins, capital expenditures, and the selection and use of an appropriate discount rate. The forecasts and assumptions are based on our annual and long-term business plans. Contrail's market approach requires management to make significant assumptions related to market multiples of earnings derived from comparable publicly-traded companies with similar operating characteristics as Contrail.

As of March 31, 2021, the fair value of the redeemable non-controlling interest is \$6.6 million. The net change in the redemption value compared to March 31, 2020 is an increase of \$0.5 million. The increase was driven by \$2.9 million related to the net change in fair value during the fiscal year ended March 31, 2021, which is reflected on our consolidated statements of equity, partially offset by net loss attributable to and distributions made to the non-controlling interest. See Note 5. The fair value increase is primarily attributable to the value associated with Contrail's potential investment in an aircraft asset management joint venture, which subsequently closed on May 5, 2021. See Note 24.

Revenue Recognition – Substantially all of the Company's revenue is derived from contracts with an initial expected duration of one year or less. As a result, the Company has applied the practical expedient to exclude consideration of significant financing components from the determination of transaction price, to expense costs incurred to obtain a contract, and to not disclose the value of unsatisfied performance obligations. We evaluate gross versus net presentation on revenues from products or services purchased and resold in accordance with the revenue recognition criteria outlined in ASC 606-10, *Principal Agent Considerations*.

The Company, under the terms of its overnight air cargo dry-lease service contracts, passes through to its air cargo customer certain cost components of its operations without markup. The cost of fuel, landing fees, outside maintenance, parts and certain other direct operating costs are included in operating expenses and billed to the customer, at cost, and included in overnight air cargo revenue on the accompanying statements of income. These pass-through costs totaled \$19.9 million and \$23.7 million for the years ended March 31, 2021 and 2020, respectively.

<u>Liquidity</u> – The Company's Credit Agreement with MBT (the Air T debt in <u>Note 13</u>) includes several covenants that are measured once a year at March 31, including, but not limited to, a financial covenant requiring a debt service coverage ratio of 1.25. The AirCo 1 Credit Agreement (the AirCo 1 debt in <u>Note 13</u>) contains an affirmative covenant relating to collateral valuation. As of March 31, 2021, the Company and AirCo 1 were in compliance with all financial covenants.

The Contrail Credit Agreement (the Contrail debt in Note 13) contains affirmative and negative covenants, including covenants that restrict the ability of Contrail and its subsidiaries to, among other things, incur or guarantee indebtedness, incur liens, dispose of assets, engage in mergers and consolidations, make acquisitions or other investments, make changes in the nature of its business, and engage in transactions with affiliates. The Contrail Credit Agreement also contains quarterly financial covenants applicable to Contrail and its subsidiaries, including a minimum debt service coverage ratio of 1.25 to 1.0 and a minimum TNW of \$15 million.

On September 25, 2020, Contrail entered into a Third Amendment to Supplement #2 to Master Loan Agreement dated June 24, 2019 with Old National Bank ("ONB"). The material changes within the Third Amendment were: (a) to extend the date for compliance with the provision where Contrail is required to pay down the total outstanding principal balance of its revolver to zero for at least thirty consecutive days to September 5, 2021; and (b) to extend the date for compliance with the required

quarterly debt service coverage ratio covenant such that Contrail shall commence compliance with the covenant commencing on March 31, 2022 and on the last day of each fiscal quarter thereafter.

Due primarily to the impact of COVID-19 on its business, as of March 31, 2021, Contrail was not in compliance with maintaining the minimum TNW of \$15 million. As of the issuance date of this report, pursuant to the existing terms of the Contrail Credit Agreement, the Company and the non-controlling interest owner of Contrail made total capital contributions to Contrail in the amount of \$1.4 million, which had the effect of curing this financial covenant non-compliance. Contrail and ONB are also in discussions to reduce the minimum TNW to \$8 million, in exchange for certain amendments to its credit agreement, including renewing its revolving line of credit at a lower amount than the current agreement. However, there is no assurance that Contrail will be successful in reducing the minimum TNW financial covenant.

The obligations of Contrail under the Contrail Credit Agreement are guaranteed by the Company, up to a maximum of \$1.6 million, plus costs of collection. The Company is not liable for any other assets or liabilities of Contrail and there are no cross-default provisions with respect to Contrail's debt in any of the Company's debt agreements with other lenders. In the possible absence of Contrail's operation as a going concern, the Company believes it, along with the rest of its businesses, will continue to operate as a going concern, given the maximum guarantee of Contrail's obligations of \$1.6 million.

On November 24, 2020, Contrail and ONB entered into Supplement #8 to Master Loan Agreement and related documentation for a loan in the aggregate amount of \$43.6 million for which ONB served as lender pursuant to the Main Street Priority Loan Facility as established by the U.S. Federal Reserve. The Contrail Main Street Loan was approved by the Fed and completed by December 8, 2020. The proceeds were used to pay down the Contrail Revolver. The loan proceeds are also to be used as working capital to support the operations of Contrail in the ordinary course of business, which includes the acquisition from time to time of aircraft and engines. The indebtedness incurred is subject to the terms and provisions of the Master Loan Agreement. The principal terms of the Contrail Main Street Loan are detailed in Note 13.

On December 11, 2020, AirCo 1 and PSB entered into a loan in the aggregate amount of \$6.2 million for which PSB served as lender pursuant to the Main Street Priority Loan Facility as established by the Fed. The AirCo 1 Main Street Loan was approved by the Fed and completed by December 22, 2020. The loan proceeds were used to pay off the AirCo 1 revolving line of credit with MBT. The principal terms of the Term Loan - PSB are detailed in Note 13.

The revolving line of credit at Air T with MBT has a due date or expires within the next twelve months. We are currently seeking to refinance this obligation prior to August 31, 2021; however, there is no assurance that we will be able to execute this refinancing or, if we are able to refinance this obligation, that the terms of such refinancing would be as favorable as the terms of our existing credit facility.

In April 2020, the Company obtained loans under the Payroll Protection Program ("PPP loan"), as authorized by the CARES Act, of \$8.2 million to help pay for payroll costs, mortgage interest, rent and utility costs. The Company has applied to MBT for forgiveness of the PPP Loan; however, forgiveness is not fully assured.

The Company believes it is probable that the cash on hand (including that obtained from the PPP and other current financings), net cash provided by operations from its remaining operating segments, together with its current revolving lines of credit, as amended or replaced, will be sufficient to meet its obligations as they become due in the ordinary course of business for at least 12 months following the date these financial statements are issued.

Recently Adopted Accounting Pronouncements

In June 2016, the FASB issued ASU 2016-13, Financial Instruments—Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. This standard significantly changes how entities measure credit losses for most financial assets and certain other instruments that are not measured at fair value through net income, including trade receivables. The standard requires an entity to estimate its lifetime "expected credit loss" for such assets at inception, and record an allowance that, when deducted from the amortized cost basis of the financial asset, presents the net amount expected to be collected on the financial asset. The Company adopted this standard on April 1, 2020. As of March 31, 2021, the standard did not have a material impact on the Company's consolidated financial statements and disclosures.

In January 2017, the FASB issued ASU 2017-04, Intangibles – Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment. This ASU simplifies how an entity is required to test goodwill for impairment by eliminating Step Two from the goodwill impairment test. Step Two measures a goodwill impairment loss by comparing the implied fair value of a reporting unit's goodwill with the carrying amount of that goodwill. Under this standard, an entity will recognize an impairment charge for the amount by which the carrying value of a reporting unit exceeds its fair value. The Company adopted this amendment on April 1, 2020. As of March 31, 2021, the amendment did not have a material impact on the Company's consolidated financial statements and disclosures.

In October 2018, the FASB updated the Consolidation (Topic 810): Targeted Improvements to Related Party Guidance for Variable Interest Entities of the Accounting Standards Codification. The amendments in this update affect reporting entities that are required to determine whether they should consolidate a legal entity under the guidance within the Variable Interest Entities Subsections of Subtopic 810-10, Consolidation—Overall. Indirect interests held through related parties in common control arrangements should be considered on a proportional basis for determining whether fees paid to decision makers and service providers are variable interests. The Company adopted this amendment on April 1, 2020. As of March 31, 2021, the amendment did not have a material impact on the Company's consolidated financial statements and disclosures.

In December 2019, the FASB updated the Income Taxes (Topic 740): Simplifying the Accounting for Income Taxes of the Accounting Standards Codification. For public business entities, the amendments in this Update are effective for fiscal years beginning after December 15, 2020, and interim periods within those fiscal years. The amendments in this Update simplify the accounting for income taxes by removing the exception to the incremental approach for intraperiod tax allocation when there is a loss from continuing operations and income or a gain from other items (for example, discontinued operations or other comprehensive income), among other changes. The Company early adopted this amendment as of April 1, 2020. The amendment resulted in an immaterial impact to its consolidated financial statements and disclosures.

Recently Issued Accounting Pronouncements

In January 2020, the FASB updated the Investments—Equity Securities (Topic 321), Investments—Equity Method and Joint Ventures (Topic 323), and Derivatives and Hedging (Topic 815)—Clarifying the Interactions between Topic 321, Topic 323, and Topic 815. For public business entities, the amendments in this Update are effective for fiscal years beginning after December 15, 2020, and interim periods within those fiscal years. The amendments clarify that an entity should consider observable transactions that require it to either apply or discontinue the equity method of accounting for the purposes of applying the measurement alternative in accordance with Topic 321 immediately before applying or upon discontinuing the equity method. The Company is currently evaluating the impact of this amendment on its consolidated financial statements and disclosures.

In March 2020, the FASB issued ASU 2020-04- Reference Rate Reform (Topic 848): Facilitation of the Effects of Reference Rate Reform on Financial Reporting. The amendments in this Update provide optional expedients and exceptions for applying generally accepted accounting principles (GAAP) to contracts, hedging relationships, and other transactions affected by reference rate reform if certain criteria are met. The amendments in this Update apply only to contracts, hedging relationships, and other transactions that reference LIBOR or another reference rate expected to be discontinued because of reference rate reform. The expedients and exceptions provided by the amendments do not apply to contract modifications made and hedging relationships entered into or evaluated after December 31, 2022, except for hedging relationships existing as of December 31, 2022, that an entity has elected certain optional expedients for and that are retained through the end of the hedging relationship. Further, in accordance with the amendments in this Update, an entity may make a one-time election to sell, transfer, or both sell and transfer debt securities classified as held to maturity that reference a rate affected by reference rate reform and that are classified as held to maturity before January 1, 2020. The amendments are effective for all entities from the beginning of an interim period that includes the issuance date of this ASU. An entity may elect to apply the amendments prospectively through December 31, 2022. The Company is currently evaluating the impact of this amendment on our contracts, hedging relationships, and other transactions affected by reference rate reform.

2. DISCONTINUED OPERATIONS

On September 30, 2019, the Company completed the sale of 100% of the equity ownership in the Company's wholly-owned subsidiary, GAS to PrimeFlight Aviation Services, Inc., a Delaware corporation. The agreement included a purchase price of \$21 million as well as an earn-out provision of \$4 million if certain performance metrics were achieved by March 31, 2020. Those metrics were not achieved per the final settlement statement received during the second quarter ended September 30, 2020. The Company received approximately \$20.5 million of total proceeds at closing after the initial net working capital adjustment. The Company recognized a pre-tax gain on the sale of GAS of approximately \$10.5 million with a tax impact of \$2.3 million for a net of tax gain of \$8.2 million.

Summarized results of operations of GAS for the year ended March 31, 2021 and 2020 through the date of disposition are as follows (in thousands):

		Year ended March 31,					
	March	31, 2021	March 31, 2020				
Net sales	\$	_	\$	16,637			
Operating Income (Expense)		4		(17,319)			
Gain/(Loss) from discontinued operations before income taxes		4		(682)			
Income tax benefit				(568)			
Income/(Loss) from discontinued operations, net of tax	\$	4	\$	(114)			

The following table presents capital expenditures, depreciation and amortization and other significant operating non-cash items of our discontinued operations for fiscal 2021 and 2020 (in thousands):

	Fiscal	year
	2021	2020
Capital expenditures		82
Depreciation and amortization	_	165
Goodwill and asset impairments	_	405

3. MAJOR CUSTOMER

Approximately 37% and 30% of the Company's consolidated revenues were derived from services performed for FedEx Corporation in fiscal 2021 and 2020, respectively. Approximately 35% and 16% of the Company's consolidated accounts receivable at March 31, 2021 and 2020, respectively, were due from FedEx Corporation.

4. VARIABLE INTEREST ENTITIES

A variable interest entity ("VIE") is an entity that either (i) has insufficient equity to permit the entity to finance its activities without additional subordinated financial support, or (ii) has equity investors who lack the characteristics of a controlling financial interest. Under ASC 810 - *Consolidation*, an entity that holds a variable interest in a VIE and meets certain requirements would be considered to be the primary beneficiary of the VIE and required to consolidate the VIE in its consolidated financial statements. In order to be considered the primary beneficiary of a VIE, an entity must hold a variable interest in the VIE and have both:

- the power to direct the activities that most significantly impact the economic performance of the VIE; and
- the right to receive benefits from, or the obligation to absorb losses of, the VIE that could be potentially significant to the VIE.

The Company concluded that its investments in Delphax's equity and debt, and its investment in the Delphax warrant, each constituted a variable interest. In addition, the Company concluded that it became the primary beneficiary of Delphax on November 24, 2015. The Company consolidated Delphax in its consolidated financial statements beginning on that date. Delphax is included within our Corporate and other segment.

Upon petition by the Company, on August 8, 2017 the Ontario Superior Court of Justice in Bankruptcy and Insolvency adjudged Delphax Canada to be bankrupt. As a result, Delphax Canada ceased to have capacity to deal with its property, which then vested in the trustee in bankruptcy of Delphax Canada subject to the rights of secured creditors. As of June 30, 2019, the bankruptcy proceedings were finalized in accordance with Canadian law and, therefore, Delphax Canada was legally discharged of its liabilities.

The conclusion of the bankruptcy proceedings also resulted in the dissolution of Delphax Canada. In addition, on June 11, 2019, the Company also fully dissolved Delphax UK. As such, the only Delphax entity that remains in existence as of March 31, 2021 is Delphax France. The Company extinguished the assets and liabilities of Delphax Canada and Delphax UK during the quarter ended June 30, 2019 and recognized a gain on dissolution of entities of \$4.5 million.

Delphax had total assets and liabilities with carrying values of \$8.0 thousand and \$0.5 million, as of March 31, 2021 and \$11.0 thousand and \$0.5 million, as of March 31, 2020.

Delphax's components of net income (loss) are included in our consolidated statements of income and comprehensive income herein. For the fiscal years ended March 31, 2021 and 2020, Delphax did not recognize any revenue, respectively. For the fiscal year ended March 31, 2021, Delphax recorded net loss and operating loss of \$48.0 thousand. For the fiscal year ended March 31, 2020, Delphax recorded net income of \$6.1 million, broken out between an operating loss of \$0.2 million and non-operating income of \$6.3 million, the majority of which was the result of the gain on dissolution of entities of \$4.5 million.

5. FAIR VALUE OF FINANCIAL INSTRUMENTS

The Company measures and reports financial assets and liabilities at fair value. Fair value measurement is classified and disclosed in one of the following three categories:

Level 1: Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2: Quoted prices in markets that are not active or inputs which are observable, either directly or indirectly, for substantially the full term of the asset or liability.

Level 3: Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e., supported by little or no market activity).

Assets Measured and Recorded at Fair Value on a Recurring Basis

The following consolidated balance sheet items are measured at fair value on a recurring basis (in thousands):

	Fair	Fair Value Measurements at March 31,			
		2021 202			
Marketable securities (Level 1)	\$	2,914	\$	3,240	
Interest rate swaps (Level 2)	\$	593	\$	914	
Debt - Trust Preferred Securities (Level 2)	\$	14,289		12,877	
Warrants Liability (Level 2)	\$	414		485	
Redeemable non-controlling interest (Level 3)	\$	6,598	\$	6,080	

The fair values of our interest rate swaps are based on the market standard methodology of netting the discounted expected future variable cash receipts and the discounted future fixed cash payments. The variable cash receipts are based on an expectation of future interest rates derived from observed market interest rate forward curves. Since these inputs are observable in active markets over the terms that the instruments are held, the derivatives are classified as Level 2 in the hierarchy. See Note
9.

The fair value of the Debt - Trust Preferred Securities was based on quoted prices as observed on the NASDAQ Global Market. The fair value of the Warrants was derived from quoted prices for a similar asset or liability as observed on the NASDAQ Global Market. Both of these items are classified as Level 2 in the hierarchy.

The fair value of the redeemable non-controlling interest is based on a combination of market approach and income approach and is classified as Level 3 in the hierarchy.

The fair value measurements which use significant observable inputs (Level 3), changed due to the following (in thousands):

	Co	deemable Non- ntrolling nterest
Beginning Balance as of April 1, 2020	\$	6,080
Contribution from non-controlling member		_
Distribution to non-controlling member		(1,244)
Net loss attributable to non-controlling interests		(1,095)
Fair value adjustment		2,857
Ending Balance as of March 31, 2021	\$	6,598

The carrying amounts reported in the consolidated balance sheets for cash and cash equivalents, restricted cash, accounts receivable, notes receivable and accounts payable approximate their fair values at March 31, 2021 and 2020.

Assets Measured and Recorded at Fair Value on a Nonrecurring Basis

The Company determines fair value of engine assets on lease or held for lease by reference to independent appraisals, quoted market prices (e.g. an offer to purchase) and other factors such as current data from manufacturers as well as specific market sales. An impairment charge is recorded when the carrying value of the asset exceeds its fair value. The Company used Level 2 inputs to measure write-downs of engine assets on lease or held for lease. As of March 31, 2021, as a result of our year-end valuation, we did not identify any impairment on our engine assets on lease or held for lease.

6. INVENTORIES

Inventories consisted of the following (in thousands):

	Year Ended March 31,				
	2021	2020			
Ground equipment manufacturing:					
Raw materials	4,695	4,192			
Work in process	5,820	2,731			
Finished goods	1,691	1,725			
Corporate and Other:					
Raw materials	462	464			
Finished goods	889	910			
Commercial jet engines and parts:	60,516	51,084			
Total inventories	74,073	61,106			
Reserves	(2,102)	(483)			
Total, net of reserves	\$ 71,971	\$ 60,623			

A write-down of \$6.4 million was recorded on the inventory of the commercial jet engines and parts segment during the fiscal year ended March 31, 2021. Of the total write-down, \$0.5 million was driven by a management decision to monetize two engines by sale to a third party, in which the net carrying values exceeded the estimated proceeds during the quarter ended September 30, 2020. The remaining write-down was attributable to our evaluation of the carrying value of inventory as of March 31, 2021, where we compared its cost to its net realizable value and considered factors such as physical condition, sales patterns and expected future demand to estimate the amount necessary to write down any slow moving, obsolete or damaged inventory.

7. ASSETS ON LEASE

The Company leases equipment to third parties, primarily through Contrail which leases engines to aviation customers with lease terms between 1 and 3 years under operating lease agreements. For the assets currently on lease, there are no options for the lessees to purchase the assets at the end of the leases. The Company depreciates the engines on a straight-line basis over the assets' useful life from the acquisition date to a residual value. Depreciation expense relating to engines on lease was \$1.9 million and \$4.4 million for the fiscal years ended March 31, 2021 and 2020, respectively.

Future minimum rental payments to be received do not include contingent rentals that may be received under certain leases because amounts are based on usage. Contingent rent earned totaled approximately \$4.9 thousand and \$3.7 million for the fiscal years ended March 31, 2021 and 2020, respectively. As of March 31, 2021, future minimum rental payments to be received under non-cancelable leases are as follows (in thousands):

Year ended Marc	<u>h 31,</u>	
2022	\$	825
2023		4,262
2024		73
2025		
2026		
Thereafter		
Total	\$	5,160

As of March 31, 2021, Contrail has one engine on lease that is due a return-to-condition compensation ("engine compensation") upon the lease termination in December 2022. The engine compensation is determined as the sum of \$3.6 million, plus a variable component calculated based on various escalation factors, including usage of flight hours and consumption of material, labor and utility. The Company estimated the engine compensation as of March 31, 2021 to be \$4.1 million, which was recorded within "Other Assets" on our consolidated balance sheets. \$3.6 million of the engine compensation is fixed, and thus is included within the \$4.3 million of future rental payments to be received during the fiscal year ended March 31, 2023.

8. PROPERTY AND EQUIPMENT

Property and equipment consisted of the following (in thousands):

	Year Ended March 31,						
	2021		2020				
Furniture, fixtures and equipment	\$ 4,852	\$	5,243				
Leasehold improvements	5,541		2,390				
Building	2,636		1,958				
	 13,029		9,591				
Less accumulated depreciation	 (4,510)		(4,319)				
Property and equipment, net	\$ 8,519	\$	5,272				

9. INVESTMENTS IN SECURITIES AND DERIVATIVE INSTRUMENTS

As part of the Company's interest rate risk management strategy, the Company, from time to time, uses derivative instruments to minimize significant unanticipated earnings fluctuations that may arise from rising variable interest rate costs associated with existing borrowings (Air T Term Note A and Term Note D). To meet these objectives, the Company entered into interest rate swaps with notional amounts consistent with the outstanding debt to provide a fixed rate of 4.56% and 5.09%, respectively, on Term Notes A and D. The swaps mature in January 2028. As of August 1, 2018, these swap contracts are designated as effective cash flow hedging instruments in accordance with ASC 815. The effective portion of changes in the fair value on these instruments is recorded in other comprehensive income and is reclassified into the consolidated statement of income as interest expense in the same period in which the underlying hedged transaction affects earnings. The interest rate swaps are considered Level 2 fair value measurements. As of March 31, 2021 and March 31, 2020, the fair value of the interest-rate swap contracts was a liability of \$0.6 million and \$0.9 million, respectively, which is included within Other Non-Current Liabilities in the consolidated balance sheets. During the twelve months ended March 31, 2021 and 2020, the Company recorded a loss of approximately \$0.3 million and a gain of \$0.5 million, net of tax, respectively, in the consolidated statement of comprehensive income (loss) for changes in the fair value of the instruments.

The Company may, from time to time, employ trading strategies designed to profit from market anomalies and opportunities it identifies. Management uses derivative financial instruments to execute those strategies, which may include options, and futures contracts. These derivative instruments are priced using publicly quoted market prices and are considered Level 1 fair value measurements. During the fiscal year ended March 31, 2021, related to these derivative instruments, the Company had a gross gain aggregating to \$0.8 million and a gross loss aggregating to \$23.7 thousand. During the fiscal year ended March 31, 2020, related to these derivative instruments, the Company had a gross gain aggregating to \$1.7 thousand and a gross loss aggregating to \$0.3 million.

The Company also invests in exchange-traded marketable securities and accounts for that activity in accordance with ASC 321, Investments- Equity Securities. Marketable equity securities are carried at fair value, with changes in fair market value included in the determination of net income. The fair market value of marketable equity securities is determined based on quoted market prices in active markets. During the fiscal year ended March 31, 2021, the Company had a gross unrealized gain aggregating to \$1.2 million. During the fiscal year ended March 31, 2020, the Company had a gross unrealized gain aggregating to \$8.4 thousand and a gross unrealized loss aggregating to \$0.5 million. These unrealized gains and losses are included in Other Income (Loss) on the consolidated Statement of Income.

The market value of the Company's equity securities and cash held by the broker are periodically used as collateral against any outstanding margin account borrowings. As of March 31, 2021 and 2020, the Company had outstanding borrowings of \$0 and \$0.4 million under its margin account, respectively, which is reflected in accrued expenses and other on the consolidated balance sheets. As of March 31, 2021 and 2020, the Company had cash margin balances related to exchange-traded equity securities and securities sold short of \$0.9 million and \$1.3 million, respectively, which is reflected in other current assets on the consolidated balance sheets. The interest rate on margin account borrowings was 9.4% as of March 31, 2021.

10. EQUITY METHOD INVESTMENTS

The Company's investment in Insignia is accounted for under the equity method of accounting. The Company has elected a three-month lag upon adoption of the equity method. On December 31, 2020, Insignia effected a seven-for-one reverse stock split of its outstanding common stock. As such, as of March 31, 2021, the number of Insignia's shares owned by the Company was adjusted to 0.5 million, representing approximately 28% of the outstanding shares. For the fiscal years ended March 31, 2021 and 2020, the Company recorded approximately \$1.2 million and \$1.5 million as its share of Insignia's net loss for the twelve months ended December 31, 2020 and 2019, respectively, along with a basis difference adjustment of approximately \$96.1 thousand. In addition to the current year's loss attribution, the previous impairments taken in prior fiscal years have accelerated the Company's net investment basis in Insignia to be zero as of March 31, 2021.

On November 8, 2019, the Company made an investment of \$2.8 million to purchase a 19.90% ownership stake in CCI, subsequently reduced to a 18.98% ownership stake as of September 30, 2020. The Company accounts for this investment under the equity method of accounting. Due to the differing fiscal year-ends, the Company has elected a three-month lag to record the CCI investment at cost, with a basis difference of \$0.3 million. For the fiscal year ended March 31, 2021, the Company recorded a gain of \$0.4 million as its share of CCI's net income for the twelve months ended December 31, 2020, along with a basis difference adjustment of \$49.9 thousand. The Company's net investment basis in CCI is \$3.8 million as of March 31, 2021.

Summarized audited financial information for the Company's equity method investees for the twelve months ended December 31, 2020 and December 31, 2019 are as follows (in thousands):

	 ve Months Ended ember 31, 2020	elve Months Ended ecember 31, 2019
Revenue	\$ 91,245	\$ 108,751
Gross Profit	4,589	7,570
Operating loss	(10,551)	(2,653)
Net loss	(1,960)	(3,645)
Net loss attributable to Air T, Inc. stockholders	\$ (760)	\$ (887)

Other		3,403		4,337
Total	\$	12,787	\$	13,024

12. LEASE ARRANGEMENTS

The Company has operating leases for the use of real estate, machinery, and office equipment. The majority of our leases have a lease term of 2 to 5 years; however, we have certain leases with longer terms of up to 30 years. Many of our leases include options to extend the lease for an additional period.

The lease term for all of the Company's leases includes the non-cancellable period of the lease, plus any additional periods covered by either a Company option to extend the lease that the Company is reasonably certain to exercise, or an option to extend the lease controlled by the lessor that is considered likely to be exercised.

Payments due under the lease contracts include fixed payments plus, for some of our leases, variable payments. Variable payments are typically operating costs associated with the underlying asset and are recognized when the event, activity, or circumstance in the lease agreement on which those payments are assessed occurs. Our leases do not contain residual value guarantees.

The Company has elected to combine lease and non-lease components as a single component and not to recognize leases on the balance sheet with an initial term of one year or less.

The interest rate implicit in lease contracts is typically not readily determinable, and as such the Company utilizes the incremental borrowing rate to calculate lease liabilities, which is the rate incurred to borrow on a collateralized basis over a similar term an amount equal to the lease payments in a similar economic environment.

The components of lease cost for the twelve months ended March 31, 2021 and 2020 are as follows (in thousands):

	Twelve Months Ended March 31, 2021	Twelve Months Ended March 31, 2020
Operating lease cost	\$ 2,134	\$ 2,093
Short-term lease cost	316	439
Variable lease cost	760	342
Total lease cost	\$ 3,210	\$ 2,874

Amounts reported in the consolidated balance sheets for leases where we are the lessee as of the years ended March 31, 2021 and 2020 were as follows (in thousands):

		March 31, 2021	March 31, 2020
Operating leases			
Operating lease ROU assets	\$	7,757 \$	8,116
Operating lease liabilities		8,445	8,647
Weighted-average remaining lease ter	rm		
Operating leases		13 years, 9 months	14 years, 4 months
Weighted-average discount rate			
Operating leases		4.37 %	4.50 %

Maturities of lease liabilities under non-cancellable leases where we are the lessee as of the year ended March 31, 2021 are as follows (in thousands):

	Operating Leases
2022	\$ 1,814
2023	1,680
2024	1,316
2025	1,013
2026	712
Thereafter	5,893
Total undiscounted lease payments	12,428
Less: Interest	(3,439)
Less: Discount	(544)
Total lease liabilities	\$ 8,445

13. FINANCING ARRANGEMENTS

Borrowings of the Company and its subsidiaries are summarized below at March 31, 2021 and March 31, 2020, respectively.

On April 13, 2020, the Company entered into a loan with MBT in a principal amount of \$8.2 million pursuant to a PPP Loan under the Coronavirus Aid, Relief, and Economic Security Act (the "CARES Act"). The PPP Loan is evidenced by a promissory note ("Note"). The Note provides for customary events of default including, among other things, cross-defaults on any other loan with MBT. The PPP Loan may be accelerated upon the occurrence of an event of default.

The PPP Loan is unsecured and guaranteed by the United States Small Business Administration ("SBA"). The Company has applied to MBT for forgiveness of the PPP Loan, with the amount which may be forgiven equal to the sum of payroll costs, covered rent and mortgage obligations, and covered utility payments incurred by the Company during the 24-week period beginning on April 13, 2020, calculated in accordance with the terms of the CARES Act. The PPP Loan bears interest at a fixed annual rate of one percent (1%). Once the forgiveness determination is made, the Company will be required to make repayments plus interest on any unforgiven amount. As of March 31, 2021, the Company has used the funds received from the PPP loan on eligible expenses as outlined in the CARES Act.

On September 25, 2020, Contrail entered into a Third Amendment to Supplement #2 to Master Loan Agreement dated June 24, 2019 with ONB. The material changes within the Third Amendment are: (a) to extend the date for compliance with the provision where Contrail is required to pay down the total outstanding principal balance of its revolver to zero for at least thirty consecutive days to September 5, 2021; and (b) to extend the date for compliance with the required quarterly debt service coverage ratio covenant such that Contrail shall commence compliance with the covenant commencing on March 31, 2022 and on the last day of each fiscal quarter thereafter.

On November 24, 2020, Contrail and ONB entered into Supplement #8 to Master Loan Agreement and related documentation for a loan in the aggregate amount of \$43.6 million for which ONB served as lender pursuant to the Main Street Priority Loan Facility as established by the U.S. Federal Reserve. The Contrail Main Street Loan was approved by the Fed and completed by December 8, 2020. The proceeds were used to pay down the Contrail Revolver. The loan proceeds are also to be used as working capital to support the operations of Contrail in the ordinary course of business, which includes the acquisition from time to time of aircraft and engines. The indebtedness incurred is subject to the terms and provisions of the Master Loan Agreement.

The principal terms of the Contrail Main Street Loan ("Term Note G") are: (a) interest on the loan accrues at a floating rate of LIBOR plus 3.00% and interest is payable commencing November 24, 2021; (b) 15% principal payments plus 15% of the amount of capitalized interest are due on November 24, 2023 and 2024, with the remainder due on the loan maturity date – November 24, 2025; (c) the loan is not guaranteed; and, (d) a 2% origination fee was paid on funding of the loan. The loan contains affirmative covenants as to cash flow coverage and tangible net worth. The terms of the loan provide for customary events of default, including, among others, those relating to a failure to make payment, breaches of representations and covenants, and the occurrence of certain events. The loan is secured by a security interest in the assets of Contrail.

On December 11, 2020, AirCo 1 and PSB entered into a loan in the aggregate amount of \$6.2 million for which PSB served as lender pursuant to the Main Street Priority Loan Facility as established by the U.S. Federal Reserve. The AirCo 1 Main Street Loan was approved by the Fed and completed by December 22, 2020. The loan proceeds were used to pay off the AirCo 1 revolving line of credit with MBT.

The principal terms of the Term Loan - PSB are: (a) interest on the loan accrues at a floating rate of 3-month LIBOR plus 3.00% and interest is payable commencing December 11, 2021; (b) 15% principal payments (including any capitalized interest accrued thereon) are due on December 11, 2023, and 2024, with the remainder due on the loan maturity date – December 11, 2025; (c) the loan is not guaranteed; and, (d) a 2% origination fee was paid on funding of the loan. The loan contains an affirmative covenant relating to collateral valuation. The terms of the loan provide for customary events of default, including, among others, those relating to a failure to make payment, breaches of representations and covenants, and the occurrence of certain events. The loan is secured by a security interest in the assets of AirCo 1 and a pledge of AirCo's membership interest in AirCo 1.

The following table provides certain information about the current financing arrangements of the Company's and its subsidiaries as of March 31, 2021 and 2020:

Total Debt, net	\$ 87,496	\$ 85,820			

Fiscal 2021's weighted average interest rate on short term borrowings outstanding was 0.0% due to the fact that all short-term borrowings outstanding as of March 31, 2021 have zero balances. The weighted average interest rate on short term borrowings outstanding as of March 31, 2020 was 3.7%.

The Air T revolving credit facility and the Contrail revolving credit facility contain affirmative and negative covenants, including covenants that restrict the ability of the Company and its subsidiaries to, among other things, incur or guarantee indebtedness, incur liens, dispose of assets, engage in mergers and consolidations, make acquisitions or other investments, make changes in the nature of its business, and engage in transactions with affiliates.

The obligations of Contrail under the Contrail Credit Agreement with ONB are secured by a first-priority security interest in substantially all of the assets of Contrail. The obligations of Contrail under the Contrail Credit Agreement are also guaranteed by the Company, up to a maximum of \$1.6 million, plus costs of collection. The Company is not liable for any other assets or liabilities of Contrail and there are no cross-default provisions with respect to Contrail's debt in any of the Company's debt agreements with MBT.

¹ Pursuant to The Paycheck Protection Flexibility Act of 2020, P.L. 116-142, the SBA extended the deferral period for loan payments to either (1) the date that SBA remits the borrower's loan forgiveness amount to MBT or (2) if Air T did not apply for loan forgiveness, 10 months after the end of Air T's loan forgiveness covered period, which is December 24, 2022. SBA does not require a formal modification to the original promissory note agreement.

² The AirCo 1 Revolver was paid off and closed as of December 31, 2020.

At March 31, 2021, our contractual financing obligations, including payments due by period, are as follows (in thousands):

Fiscal year ended	Amount		
2022	\$	5,639	
2023		5,711	
2024		9,037	
2025		9,037	
2026		41,163	
Thereafter		18,050	
		88,637	
Less: Unamortized Debt Issuance Costs		(1,141)	
	\$	87,496	

The Company assumes various financial obligations and commitments in the normal course of its operations and financing activities. Financial obligations are considered to represent known future cash payments that the Company is required to make under existing contractual arrangements such as debt and lease agreements.

Fair Value of Debts - As of March 31, 2021 and 2020, the carrying amounts reported in the consolidated balance sheets for the Company's debt instruments approximate the fair values. Estimated fair values are determined by comparing current borrowing rates and risk spreads offered in the market (Level 2 fair value measures) or quoted market prices (Level 1 fair value measures), when available, to the stated interest rates and spreads on the Company's debts.

Interest Expense, net - The components of net interest expense during the years ended March 31, 2021 and March 31, 2020 are as follows (in thousands):

	March 31, 2021	March 31, 2020
Contractual interest	4,352	4,458
Amortization of deferred financing costs	288	237
Interest income	(16)	(3)
Total	4,624	4,692

Other - On June 10, 2019, the Company completed a transaction with all holders of the Company's Common Stock to receive a special, pro-rata distribution of the securities enumerated below:

- A dividend of one additional share for every two shares already held (a 50% stock dividend, or the equivalent of a 3-for-2 stock split). See Note 22.
- The Company issued and distributed to existing common shareholders, via a non-cash transaction from equity, an aggregate of 1.6 million trust preferred capital security shares (aggregate \$4.0 million stated value) and an aggregate of 8.4 million warrants (representing warrants to purchase \$21.0 million in stated value of TruPs).

On January 14, 2020, Air T effected a one-for-ten reverse split of its TruPs. As a result of the reverse split, the stated value of the TruPs currently is \$25.00 per share. Further, each Warrant conferred upon its holder the right to purchase one-tenth of a share of TruPs for \$2.40, representing a 4% discount to the new stated value of \$2.50 for one-tenth of a share.

As of March 31, 2021, approximately 4.1 million Warrants have been exercised. As a result, the amount outstanding on the Company's Debt - Trust Preferred Securities is \$14.3 million as of March 31, 2021.

At March 31, 2021, the Company had Warrants outstanding and exercisable to purchase approximately 4.3 million shares of its TruPs at an exercise price of \$2.40 per one-tenth of a share. The Warrants will expire on August 30, 2021 or earlier upon redemption or liquidation.

14. RELATED PARTY MATTERS

Contrail Aviation Support, LLC leases its corporate and operating facilities at Verona, Wisconsin from Cohen Kuhn Properties, LLC, a limited liability company whose membership interests are owned by Mr. Joseph Kuhn, Contrail's Chief Executive Officer and Mrs. Miriam Cohen-Kuhn, Contrail's Chief Financial Officer, equally. The facility consists of approximately 21,000 square feet of warehouse and office space. The Company paid aggregate rental payments of approximately \$0.2 million to Cohen Kuhn Properties, LLC pursuant to such lease during the period from April 1, 2020 through March 31, 2021. The lease for this facility originally was to expire on June 30, 2021, however; in April 2021, the Company executed the option to renew the lease for an additional period of 5 years on the same terms. The lease agreement provides that the Company shall be responsible for maintenance of the leased facilities and for utilities, taxes and insurance. The Company believes that the terms of such leases are no less favorable to the Company than would be available from an independent third party.

Gary S. Kohler, a director of the Company, entered into an employment agreement with Blue Clay Capital Management, a wholly-owned subsidiary of the Company, in the Corporate and other segment, to serve as its Chief Investment Officer in return for an annual salary of \$50.0 thousand plus variable compensation based on the management and incentive fees to be paid to the subsidiary by certain of these investment funds and eligibility to participate in discretionary annual bonuses.

Nick Swenson, CEO of the Company, is also the majority shareholder of CCI. As of March 31, 2021, Mr. Swenson owned 66.7% of ownership interests in CCI. Under the VIE model, Mr. Swenson is the primary beneficiary of CCI due to the high extent of his ownership relative to other shareholders of CCI, and the lack of shared power between Mr. Swenson and the Company ("the related party group") to direct the activities of CCI that most significantly impact CCI's economic performance.

15. EMPLOYEE AND NON-EMPLOYEE STOCK OPTIONS

Air T, Inc. maintains a stock option plan for the benefit of certain eligible employees and directors. In addition, Delphax maintains a number of stock option plans. Compensation expense is recognized over the requisite service period for stock options which are expected to vest based on their grant-date fair values. The Company uses the Black-Scholes option pricing model to value stock options granted under the Air T, Inc. plan and the Delphax plans. The key assumptions for this valuation method include the expected term of the option, stock price volatility, risk-free interest rate and dividend yield. Many of these assumptions are judgmental and highly sensitive in the determination of compensation expense.

No options were granted under Air T, Inc.'s stock option plan during the fiscal years ended March 31, 2021 and 2020. No stock-based compensation expense with respect to this plan was recognized for the year ended March 31, 2021 and 2020, respectively. At March 31, 2021, there was no unrecognized compensation expense related to the Air T Inc. stock options.

There was no activity during the fiscal years ended March 31, 2021 and 2020 under the Delphax option plans. Option activity during the fiscal years ended March 31, 2020 (retrospectively adjusted to account for the stock split on June 10, 2019) and 2021 is summarized below:

	Shares	Weighted Average Exercise Price Per Share	Weighted Average Remaining Life (Years)	 Aggregate Intrinsic Value
Outstanding at March 31, 2019	11,250	\$ 6.61	4.07	\$ 152,075

Outstanding at March 31, 2020	11,250	6.61	3.07	66,388
Granted	_	_		
Exercised				
Forfeited	_	<u> </u>		
Repurchased				
Outstanding at March 31, 2021	11,250	\$ 6.61	2.07	\$ 193,063
Exercisable at March 31, 2021	11,250	\$ 6.61	2.07	\$ 193,063

16. REVENUE RECOGNITION

Performance Obligations

The following is a description of the Company's performance obligations as of March 31, 2021:

Type of Revenue	Nature, Timing of Satisfaction of Performance Obligations, and Significant Payment Terms
Product Sales	The Company generates revenue from sales of various distinct products such as parts, aircraft equipment, printing equipment, jet engines, airframes, and scrap metal to its customers. A performance obligation is created when the Company accepts an order from a customer to provide a specified product. Each product ordered by a customer represents a performance obligation.
	The Company recognizes revenue when obligations under the terms of the contract are satisfied; generally, this occurs at a point-in-time upon shipment or when control is transferred to the customer. Transaction prices are based on contracted terms, which are at fixed amounts based on standalone selling prices. While the majority of the Company's contracts do not have variable consideration, for the limited number of contracts that do, the Company records revenue based on the standalone selling price less an estimate of variable consideration (such as rebates, discounts or prompt payment discounts). The Company estimates these amounts based on the expected incentive amount to be provided to customers and reduces revenue accordingly. Performance obligations are short-term in nature and customers are typically billed upon transfer of control. The Company records all shipping and handling fees billed to customers as revenue.
	The terms and conditions of the customer purchase orders or contracts are dictated by either the Company's standard terms and conditions or by a master service agreement or by the contract.
Support Services	The Company provides a variety of support services such as aircraft maintenance, printer maintenance, and short-term repair services to its customers. Additionally, the Company operates certain aircraft routes on behalf of FedEx. A performance obligation is created when the Company agrees to provide a particular service to a customer. For each service, the Company recognizes revenues over time as the customer simultaneously receives the benefits provided by the Company's performance. This revenue recognition can vary from when the Company has a right to invoice to the output or input method depending on the structure of the contract and management's analysis.
	For repair-type services, the Company records revenue over-time based on an input method of costs incurred to total estimated costs. The Company believes this is appropriate as the Company is performing labor hours and installing parts to enhance an asset that the customer controls. The vast majority of repair-services are short term in nature and are typically billed upon completion of the service.
	Some of the Company's contracts contain a promise to stand ready as the Company is obligated to perform certain maintenance or administrative services. For most of these contracts, the Company applies the 'as invoiced' practical expedient as the Company has a right to consideration from the customer in an amount that corresponds directly with the value of the entity's performance completed to date. A small number of contracts are accounted for as a series and recognized equal to the amount of consideration the Company is entitled to less an estimate of variable consideration (typically rebates). These services are typically ongoing and are generally billed on a monthly basis.

In addition to the above type of revenues, the Company also has Leasing Revenue, which is in scope under Topic 842 (Leases) and out of scope under Topic 606 and Other Revenues (Freight, Management Fees, etc.) which are immaterial for disclosure under Topic 606. In the current fiscal year, the Company also generated revenue from the sale of assets on lease or held for lease.

The following table summarizes disaggregated revenues by type (in thousands):

	Year Ended				
	Marcl	h 31, 2021	Marc	March 31, 2020	
Product Sales					
Air Cargo	\$	19,892	\$	23,690

Corporate and other		803		511	
Total	\$	175,121	\$	236,785	

See <u>Note 20</u> for the Company's disaggregated revenues by geographic region and <u>Note 21</u> for the Company's disaggregated revenues by segment. These notes disaggregate revenue recognized from contracts with customers into categories that depict how the nature, amount, timing, and uncertainty of revenue and cash flows are affected by economic factors.

Contract Balances and Costs

Contract liabilities relate to deferred revenue and advanced customer deposits with respect to product sales. The following table presents outstanding contract liabilities as of April 1, 2020 and March 31, 2021 and the amount of contract liabilities that were recognized as revenue during the year ended March 31, 2021 (in thousands):

	Outstand	ling Contract Liabilities	Outstanding Contract Liabilities Recognized as Revenue
As of March 31, 2021	\$	1,358	
As of April 1, 2020	\$	1,853	
For the year ended March 31, 2021			\$ 777

17. EMPLOYEE BENEFITS

The Company has a 401(k) defined contribution plan covering domestic employees and an 1165(e) defined contribution plan covering Puerto Rico based employees ("Plans"). All employees of the Company are immediately eligible to participate in the Plans. The Company's contribution to the Plans for the years ended March 31, 2021 and 2020 was approximately \$0.5 million and \$0.6 million, respectively, and was recorded in the consolidated statements of income.

The Company, in each of the past three years, has paid a discretionary profit sharing bonus in which all employees have participated. Profit sharing expense in fiscal 2021 and 2020 was approximately \$1.5 million and \$3.5 million, respectively, and was recorded in general and administrative expenses in the consolidated statements of income.

18. INCOME TAXES

Income tax expense (benefit) attributable to (loss) income from continuing operations consists of (in thousands):

	Year Ended March 31,				
		2021	2020		
Current:					
Federal	\$	(3,330)	\$ 43

Other differences, net		173	-1.4%	51	1.9%
Income tax benefit	\$	(3,387)	28.8% \$	(544)	-20.7%

The Company did not record any liabilities for uncertain tax positions for the fiscal years ended March 31, 2021 and March 31, 2020.

During the fiscal period ended March 31, 2020, the Company sold GAS. See Note 2. The tax benefit related to this entity allocated to discontinued operations for March 31, 2020 was \$0.6 million. In addition, a gain on the sale of discontinued operations was recognized, resulting in a net of tax gain of \$8.2 million.

The Company has state gross operating losses of \$6.4 million at March 31, 2021. These net operating losses will begin to expire in tax year 2030. The Company has foreign tax credits of \$0.5 million that will begin to expire in tax year 2026.

DSI and Delphax (collectively known as the "Delphax entities") are not included in Air T's consolidated tax return. During the year ended March 31, 2021, DSI and Delphax accounted for \$0.3 million and \$(0.1) million, respectively, of fiscal year 2021's valuation allowance effect. During the year ended March 31, 2020, each entity, respectively, accounted for \$0.2 million and \$(8.9) million of the fiscal year 2020's valuation allowance effect. The valuation allowance release in March 31, 2020 relates to attribute reduction for cancellation of debt income and dissolution of the Canadian and UK subsidiaries (See Note 4). Impairment on investments and changes in unrealized losses related to available-for-sale securities and foreign tax credits accounted for the remaining valuation allowance effect for each year.

In March of 2020, the CARES Act was enacted and made significant changes to federal tax laws, including certain changes that were retroactive to the March 31, 2020 tax year. Changes in tax laws are accounted for in the period of enactment and the retroactive effects are recognized in these financial statements. Of the changes impactful to the Company, the CARES act permits favorable treatment of deductible interest expense as well as the ability to carryback tax losses incurred in the March 31, 2021 fiscal year up to 5 years and recoup previously paid federal income taxes; under which the Company was subject to a higher federal tax rate. The benefit of the recoupment of these taxes are included in these consolidated financial statements and the Company expects to receive a refund of \$3.4 million.

Deferred tax assets and liabilities were comprised of the following (in thousands):

	2021	2020
Net operating loss & attribute carryforwards	\$ 4,	094 \$ 3,524
Unrealized losses on investments	1,	504 1,693
Investment in foreign subsidiaries	1,	331 1,369
Investment in partnerships		821 840
Lease liabilities	1,	999 1,909
Other deferred tax assets	1,	991 1,019
Total deferred	l tax assets 11,	740 10,354
Bargain purchase gain	((470) (385)
Property and equipment	(1,	184) (485)
Right-of-use assets	(1,	838) (1,791)
Capital gain deferment	(1,	782) (1,700)
Other deferred tax liabilities		(35) (167)
Total deferred tax	c liabilities (5,	309) (4,528)
Net deferre	ed tax asset \$ 6,	431 \$ 5,826
Less valuation	allowance (7,	026) (6,405)
Net deferred t	ax liability \$ ((595) \$ (579)

Delphax entities

As described in Note 4, effective on November 24, 2015, Air T, Inc. purchased interests in Dephax. With an equity investment level by the Company of approximately 67%, Delphax is required to continue filing a separate United States corporate tax return. Furthermore, Delphax has foreign subsidiaries located in France, and historically had foreign subsidiaries located in Canada and the United Kingdom; all of which file(d) tax returns in those jurisdictions. With few exceptions, Delphax, is no longer subject to examinations by income tax authorities for tax years before 2015.

Delphax maintains a September 30 fiscal year end and DSI maintains a March 31 fiscal year end. The returns for the fiscal years ended September 30, 2020 and March 31, 2021 have not yet been filed. Included in the deferred tax balances above and related to the Delphax entities are estimated foreign and U.S. federal loss carryforwards of \$6.1 million and \$8.5 million, respectively. The net operating losses expire in varying amounts beginning in the tax year 2027.

The provisions of ASC 740 require an assessment of both positive and negative evidence when determining whether it is more-likely-than-not that deferred tax assets will be recovered. In accounting for the Delphax entities' tax attributes, the Company has established a full valuation allowance of \$5.0 million at March 31, 2021, and \$4.8 million at March 31, 2020. The cumulative tax losses incurred by the Delphax entities in recent years was the primary basis for the Company's determination that a full valuation allowance should be established against the Delphax entities' net deferred tax assets.

The Company continues to assert that it will permanently reinvest any foreign earnings of DSI in a foreign country and will not repatriate those earnings back to the U.S. As a result of its permanent reinvestment assertion, the Company has not recorded deferred taxes related to DSI under the indefinite exception.

21. SEGMENT INFORMATION

The Company has four reportable segments: overnight air cargo, ground equipment sales, commercial jet engine and parts and corporate and other. Due to insignificance, the Company combined the previous printing and equipment segment into corporate and other. We have presented prior periods based on the current presentation. Segment data is summarized as follows (in thousands):

Operating Revenues: 2021 2020 Overnight Air Cargo \$ 66,251 \$ 75,275 Ground Equipment Sales: \$ 51,558 \$ 54,108 International 9,121 5,048 Total Ground Equipment Sales 60,679 59,156 Commercial Jet Engines and Parts 28,235 57,528 International 18,558 43,756 Total Commercial Jet Engines and Parts 46,793 101,284 Corporate and Other 967 799 International 431 271 Total Corporate and Other 1,398 1,070 Total Corporate and Other 1,398 1,070 Total \$ 175,121 \$ 236,785 Operating Income (Loss): Voernight Air Cargo \$ 2,178 \$ 749 Ground Equipment Sales 8,948 7,302 Commercial Jet Engines and Parts (10,882) 8,322 Corporate and Other 9,419 9,082 Total \$ 9,175 \$ 7,291 Capital Expenditures: Overnight Air Cargo<		Year Ended March 31,

22. EARNINGS PER COMMON SHARE

Basic earnings per share has been calculated by dividing net income attributable to Air T, Inc. stockholders by the weighted average number of common shares outstanding during each period. For purposes of calculating diluted earnings per share, shares issuable under stock options were considered potential common shares and were included in the weighted average common shares unless they were anti-dilutive.

The computation of earnings per common share is as follows (in thousands, except per share data):

		Year Ended	<u>l М</u> а	arch 31,
		2021		2020
Net (loss) income from continuing operations	\$	(8,394)	\$	3,168
Net loss (income) from continuing operations attributable to non-controlling interests		1,113		(3,577)
Net loss from continuing operations attributable to Air T, Inc. Stockholders	_	(7,281)		(409)
Loss from continuing operations per share:				
Basic	\$	(2.53)	\$	(0.15)
Diluted	\$	(2.53)	\$	(0.15)
Antidilutive shares Excluded from Computation of loss per share from continuing operations		6		7
Loss from discontinued operations, net of tax		_		(114)
Gain on sale of discontinued operations, net of tax		4		8,179
Gain from discontinued operations attributable to Air T, Inc. stockholders	_	4	_	8,065
Income from discontinued operations per share:				
Basic	\$	_	\$	2.89
Diluted	\$	_	\$	2.88
Antidilutive shares Excluded from Computation of income per share from discontinued operations		_		_
(Less) Income manch one.				
(Loss) Income per share: Basic	¢	(2.52)	¢	2.74
Diluted	\$ \$	(2.53) (2.53)		
Diluted	Þ	(2.53)	Þ	2.73
Antidilutive shares Excluded from Computation of (loss) income per share		6		
Weighted Average Shares Outstanding:				
Basic		2,882		2,791
Diluted		2,882		2,798
Ditaton		2,002		2,770

23. COMMITMENTS AND CONTINGENCIES

Impact of COVID-19 — As further discussed in Note 1, the full extent and duration of the impact of COVID-19 on the U.S. and world economies generally, and the Company's business in particular, is uncertain. As of March 31, 2021, no contingencies have been recorded on the Company's consolidated balance sheet as a result of COVID-19, however, the global pandemic could have long-term impacts on the Company's financial condition, results of operations, and cash flows and the pandemic could once again worsen in the future. Refer to Note 1 for further discussion of COVID-19.

24. SUBSEQUENT EVENTS

Aircraft capital joint venture

On May 6, 2021, the Company announced the May 5, 2021 formation of a new aircraft asset management business called Contrail Asset Management, LLC ("CAM"), and a new aircraft capital joint venture called Contrail JV II LLC ("CJVII"). The new joint venture was formed as a scalable asset management platform to complement the Company's existing operating businesses. The new venture will focus on acquiring commercial aircraft and jet engines for leasing, trading and disassembly. CJVII will target investments in current generation narrow-body aircraft and engines, building on Contrail Aviation's origination and asset management expertise.

CJVII will initially be capitalized with up to \$408 million of equity from Air T and three institutional investor partners, consisting of \$108 million in initial commitments and \$300 million in upsize capacity, contingent on underwriting and transaction appeal. The three investor partners bring significant aviation experience to the joint venture.

The Company and Mill Road Capital ("MRC") have agreed to became common members in CAM, the aircraft asset management business. CAM will serve two separate and distinct functions: 1) to direct the sourcing, acquisition and management of aircraft assets owned by CJVII ("Asset Management Function"), and 2) to directly invest into CJVII alongside other institutional investment partners ("Investment Function"). The Company and its affiliates will perform the services required for the Asset Management Function in exchange for 90% of the economic interest derived therefrom. For the Asset Management Function, CAM will receive origination fees, management fees, consignment fees (where applicable) and a carried interest.

For its Investment Function, CAM has an initial commitment to CJVII of approximately \$53 million, which is comprised of an \$8 million initial commitment from the Company and an approximately \$45 million initial commitment from MRC. Any investment returns will be shared pro-rata between the Company and MRC.

The CAM LLC Agreement provides that the limited liability company and each series will continue for a period of seven (7) years from the closing date, provided that the term of the company and each series may be extended for two (2) consecutive one-year periods after the initial term.

At the Market Offering

On May 14, 2021, the Company and Air T Funding (the "Trust") entered into an At the Market Offering Agreement (the "ATM Agreement") with Ascendiant Capital Markets, LLC (the "sales agent" or "Ascendiant"), pursuant to which the Trust may sell and issue its Alpha Income Preferred Securities having an aggregate offering price of up to \$8 million (the "Capital Securities") from time to time through Ascendiant, as the Trust's sales agent (the "ATM Offering"). The Trust has no obligation to sell any of the Capital Securities, and may at any time suspend offers under the ATM Agreement or terminate the ATM Agreement.

Sales of the Capital Securities, if any, under the ATM Agreement may be made in transactions that are deemed to be "at-the-market" equity offerings as defined in Rule 415 under the Securities Act of 1933, as amended, including sales made by means of ordinary brokers' transactions, including on the NASDAQ Stock Market. Subject to the terms and conditions of the ATM Agreement, the sales agent will use its reasonable efforts to sell the Capital Securities from time to time based upon the Trust's instructions (including any price, time, or size limits or other parameters or conditions the Trust may impose). The Trust or the Company will pay the sales agent a commission of up to 3.0% of the gross sales price of any Capital Securities sold under the ATM Agreement. The Trust has also provided the sales agent with customary indemnification rights.

The Capital Securities will be offered and sold pursuant to the Company's and the Trust's shelf registration statement on Form S-3 (File Nos. 333-254110-01 and 333-254110). On May 14, 2021, the Company and the Trust filed a prospectus supplement relating to the ATM Offering with the Securities and Exchange Commission.

Under the terms of the ATM Agreement, the Trust may also sell Capital Securities to Ascendiant as principal for its own account at a price agreed upon at the time of the sale, subject to the Trust entering into a separate terms agreement with Ascendiant for any such sale.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None

Item 9A Controls and Procedures

Disclosure Controls

Our Chief Executive Officer and Chief Financial Officer, referred to collectively herein as the Certifying Officers, are responsible for establishing and maintaining our disclosure controls and procedures that are designed to ensure that information relating to the Company required to be disclosed in the reports that the Company files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, including ensuring that such information is accumulated and communicated to the Company's management, including the Chief Executive Officer and the Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. The Certifying Officers have reviewed and evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Rules 240.13a-15(e) and 15d-15(e) promulgated under the Securities Exchange Act of 1934) as of March 31, 2021. Our Chief Executive Officer and Chief Financial Officer concluded that, as of March 31, 2021, the Company's disclosure controls and procedures were effective. In addition, we believe that the consolidated financial statements in this annual report fairly present, in all material respects, the Company's consolidated financial condition as of March 31, 2021, and consolidated results of its operations and cash flows for the year then ended, in conformity with U.S. generally accepted accounting principles ("GAAP").

Management's Report on Internal Control Over Financial Reporting

Internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act, is a process designed by, or under the supervision of, the Company's Chief Executive Officer and Chief Financial Officer, or persons performing similar functions, and effected by the Company's board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, is responsible for establishing and maintaining policies and procedures designed to maintain the adequacy of the Company's internal control over financial reporting, including those policies and procedures that:

- (1) Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- (2) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and
- (3) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

The Company's management has evaluated the effectiveness of the Company's internal control over financial reporting as of March 31, 2021 based on the criteria established in a report entitled Internal Control-Integrated Framework (2013), issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our assessment and those criteria, the Company's management has concluded that the Company's internal control over financial reporting was effective at the reasonable assurance level as of March 31, 2021.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

There were no changes in our internal control over financial reporting identified in connection with the evaluation required by paragraph (d) of Exchange Act Rules 13a-15 or 15d-15 that occurred during fiscal quarter ended March 31, 2021 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information.

(a) Other Information

The Company and the Trust entered into the Second Amended and Restated Trust Agreement on June 23, 2021 and the document is filed as exhibit 10.31 hereto. The trust amendment updates and makes some clarifying changes to the trust agreement.

The Company and MBT entered into the Joinder Security Agreements on June 23, 2021, which are filed as exhibit 10.99 and exhibit 10.101 hereto. The loan amendments add Air'Zona Aircraft Services, Inc. and Jet Yard Solutions, LLC as guarantors to the Second Amended and Restated Credit Agreement.

The foregoing summary of the terms of the transaction documents do not purport to be complete and is qualified in its entirety by reference to the documents which are filed as Exhibits <u>10.31</u>, <u>10.99</u>, <u>10.100</u>, <u>10.101</u>, and <u>10.102</u> respectively hereto and are incorporated by reference herein.

Item 9C. Disclosure Regarding Foreign Jurisdictions that Prevent Inspections.

Not Applicable.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The information contained under the headings "Proposal 1 - Election of Directors," "Executive Officers," "Committees of the Board of Directors," and "Delinquent Section 16(a) Reports" in our Proxy Statement to be filed within 120 days of our fiscal year end, is incorporated herein by reference.

Audit Committee Report

The Audit Committee reviews the Company's financial reporting process on behalf of the Board of Directors. Management has the primary responsibility for the financial statements and the reporting process.

In this context, the Audit Committee has reviewed and discussed with management and the independent registered public accounting firm the audited financial statements as of and for the year ended March 31, 2021. The Audit Committee has discussed with the independent registered public accounting firm the matters required to be discussed by Auditing Standard No. 1301, Communications with Audit Committee, as adopted by the Public Company Accounting Oversight Board and currently in effect. In addition, the Audit Committee discussed with the independent registered public accounting firm the written disclosures and letter required by Public Company Accounting Oversight Board Ethics and Independence Rule 3526, Communication with Audit Committees Concerning Independence, regarding the independent registered public accounting firm's communication with the Audit Committee concerning independence and discussed with them their independence from the Company and its management. The Audit Committee also has considered whether the independent registered public accounting firm's provision of non-audit services to the Company is compatible with their independence.

Based on the reviews and discussions referred to above, the Audit Committee recommended to the Board of Directors that the audited financial statements be included in the Company's Annual Report on Form 10-K for the year ended March 31, 2021 for filing with the Securities and Exchange Commission.

June 25, 2021

AUDIT COMMITTEE

Travis Swenson, Chair Peter McClung Ray Cabillot

Code of Ethics

The Company has adopted a code of ethics applicable to its executive officers and other employees. A copy of the code of ethics is available on the Company's internet website at http://www.airt.net. The Company intends to post waivers of and amendments to its code of ethics applicable to its principal executive officer, principal financial officer, principal accounting officer or controller or persons performing similar functions on its Internet website.

Item 11. Executive Compensation.

The information contained under the heading "Executive Compensation," "Base Salary," "Incentive and Bonus Compensation," "Retirement and Other Benefits," "Executive Compensation Tables," "Employment Agreement and Retirement Savings Plan" and "Director Compensation" in our Proxy Statement to be filed within 120 days of our fiscal year end, is incorporated herein by reference..

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

The information contained under the heading "Certain Beneficial Owners of Common Stock," "Director and Executive Officer Stock Ownership," in our Proxy Statement to be filed within 120 days of our fiscal year end, is incorporated herein by reference.

Equity Compensation Plan Information

The following table provides information as of March 31, 2021, regarding shares outstanding and available for issuance under Air T, Inc.'s existing equity compensation plans.

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans (excluding securities listed in first column)
Equity compensation plans approved by security holders	11,250	\$ 6.61	
Equity compensation plans not approved by security			
holders			
Total	11,250	\$ 6.61	

Item 13. Certain Relationships and Related Transactions and Director Independence.

The information contained under the heading "Director Independence" and "Certain Transactions" in our Proxy Statement to be filed within 120 days of our fiscal year end, is incorporated herein by reference.

Item 14. Principal Accountant Fees and Services.

The information contained under the heading "Audit Committee Pre-approval of Auditor Engagements" and "Audit Fees" in our Proxy Statement to be filed within 120 days of our fiscal year end, is incorporated herein by reference.

PART IV

Item 15. Exhibits and Financial Statement Schedules.

- 1. Financial Statements
 - a. The following are incorporated herein by reference in Item 8 of Part II of this report:
 - (i) Report of Independent Registered Public Accounting Firm Deloitte & Touche LLP
