

**Database Architect and Investment / Derivatives Analyst — Blue Bolt Asymmetric Fund**  
Minneapolis, MN & Remote

***Job Description & Responsibilities:***

We are seeking a skilled, imaginative, and hard-working self-starter. He/she must have a fascination with securities markets, world affairs, and pricing high-impact yet low-probability movements. You must enjoy working with data to discern potential trade opportunities. The position offers the opportunity to get in on the ground floor of an exciting venture and definitely has opportunities to expand the scope and nature of the work. In this role your career has the chance of making a giant jump.

The successful candidate will have daily interactions with highly competent senior leadership in a small, exciting and high-performance environment. We want you to develop and investigate data sets and then present them in an electronic dashboard environment in a timely manner in order to facilitate profitable trades. This will be a key responsibility of the selected candidate. The successful candidate will also provide proactive trade and research flow-trading support, based on the developed data sets.

Interested candidates please email [careers@bccmadvisors.com](mailto:careers@bccmadvisors.com) with a resume and cover letter. BCCM Advisors, a subsidiary of Air T, Inc. (NASDAQ: AIRT), is an alternative asset manager focused on making investments that are on the left side of long-term trends.

**Roles & Responsibilities:**

---

- Organize and manage large data sets derived from global securities prices.
- Build models to sort and identify investment ideas.
- Develop and manage models on selected securities & their derivatives.
- Populate and distribute regular reports about investment positions.
- Prepare presentation materials for current and prospective clients.
- Support the investment team in researching and investing its portfolio.
- Manage ad hoc projects ranging from the mundane to the monumental.

**Technical Competencies (a subset is acceptable):**

---

- Experience in database architecture and development
- SQL Server, DynamoDB, RDS, or other DBMS
- SQL and SSRS
- API integration
- Data visualization tools such as PowerBI (preferred) or Tableau
- Cloud operations in AWS
- Development of Stored Procedures
- Communication proficiency
- Experience in research labs or the equivalent
- Excellent time management skills

**Attributes:**

---

- 0-5 years of experience in investment management, with an emphasis on organizing databases and generating ideas
- Persistent researcher who will take pride in building a world-beating dataset
- Basic knowledge of equity derivatives is a plus
- Knowledge of data modeling concepts with experience in programming languages and big data
- Prior experience managing database instances in cloud environments, ideally AWS.
- Basic knowledge of Python is preferred
- Well organized, conscientious and available to travel

**Benefits:**

---

- Salary consistent with full-time employment
- Annual bonus dependent upon individual and investment vehicles' performance
